*Phases of Faith with an Introduction by U. C. Knoepfmacher* Francis William Newman, 1860      The Evolving God J. David Pleins, 2013-06-06 In focusing on the story of Darwin's religious doubts scholars too often overlook Darwin's positive contribution to the study of religion J David Pleins traces Darwin's journey in five steps He begins with Darwin's global voyage where his encounter with religious and cultural diversity transformed his understanding of religion Surprisingly Darwin wrestles with serious theological questions even as he uncovers the evolutionary layers of religion from savage roots Next we follow Darwin as his doubts about traditional biblical religion take root affecting his career choice and marriage to Emma Wedgwood Pleins then examines Darwin's secret notebooks as he searches for a materialist theory of religion Again other surprises loom as Darwin's reading of Comte's three stages of religion's development actually predate his reading of Malthus Pleins explores how Darwin applied his discovery to the realm of ethics by formulating an evolutionary view of the Golden Rule in his *Descent of Man* Finally he considers Darwin's later reflections on the religion question as he wrestled with whether his views led to atheism agnosticism or a new kind of theism *The Evolving God* concludes by looking at some of the current religious debates surrounding Darwin and suggests the need for a deeper appreciation for Darwin as a religious thinker Though he grew skeptical of traditional Christian dogma Darwin made key discoveries concerning the role and function of religion as a natural evolutionary phenomenon      *Hans Christian Ørsted and the Romantic Legacy in Science* Robert M. Brain, Robert S. Cohen, Ole Knudsen, 2007-10-16 This fascinating text is an exploration of the relationship between science and philosophy in the early nineteenth century This subject remains one of the most misunderstood topics in modern European intellectual history By taking the brilliant career of Danish physicist philosopher Hans Christian Ørsted as their organizing theme leading international philosophers and historians of science reveal illuminating new perspectives on the intellectual map of Europe in the age of revolution and romanticism      **Phases of Faith. 6th Ed. Reprinted; with an Introduction by U.C. Knoepfmacher** Francis William NEWMAN, 1970      *The Oxford Movement and Its Leaders, Supplement* Lawrence N. nature and the use of myth and memory To express the Victorians estimation of poetry for example Dawson presents the contrasting views help by two eminent Victorians Macaulay and Carlyle In Macaulay s opinion the advance of civilization led to the decline of poetry Carlyle on the other hand saw the poet as a spiritual liberator in a world of materialists The fusion of the poet s personal and public roles is witnessed in a discussion of the two mid Victorian Poet Laureates Wordsworth and his successor Tennyson In analyzing the relationship between the two writers works Dawson also highlights the extent of the Victorians admiration for Dante To give a wider perspective of the status of literature during this time Dawson examines reviews prefaces and other remarks Critics he shows made a clear distinction between poetry and fiction Thus in 1850 a comparison between say Wordsworth and Dickens would not have been made Dawson however does compare the two by focusing on their uses of autobiography Dickens surfaces again in a discussion of Victorian periodical publishing Here Dawson compares the Pre Raphaelites short lived journal The Germ with Dickens enormously popular Household Words and a radical paper The Red Republican which printed the first English version of The Communist Manifesto in 1850 In bringing together materials that have often been seen as disparate and unrelated and by suggesting new literary and ideological relationships Carl Dawson has written a book to inform almost any reader whether scholar of Victorian literature or lover of Dicken s novels
