TEILHARD, EINSTEIN, AND THE MEANING OF FAITH

Wednesday October 25th
2-3.30pm (UK time)

PRESENTER:
Dr John F. Haught

John F. Haught is an American theologian and a Distinguished Research Professor at Georgetown University. He specializes in Roman Catholic systematic theology, with a particular interest in issues pertaining to physical cosmology, evolutionary biology, geology, and Christianity.

Although Albert Einstein denied the existence of a personal God, he considered himself deeply religious, and he thought that good science cannot take place without faith. To understand what he meant by religion and faith, this presentation will place the celebrated physicist in "conversation" with his contemporary, Pierre Teilhard de Chardin, SJ. The two scientists had been living in the United States within miles of each other when they both died in 1955 only days apart. If they had ever met, and if they had been able to talk about science and faith, how would the conversation have gone? What would they have said to each other about prayer, God, and the relationship of theology to science? This talk, with the presenter as "moderator" of the conversation, will attempt to outline points of agreement and disagreement between the two great scientists and religious thinkers.

All our sessions as time shown via ZOOM (UK Time)

Phenomenon Of Teilard

Thomas Corbishley

Phenomenon Of Teilhard:

The Human Phenomenon Sarah Appleton-Weber,2003-09-01 In this work Teilhard guides the reader back in space time to experience the birth of our planet as it imprisons the human future in its globe and motion then forward through the emergence of life and the birth of thought and socialization *Teilhard de Chardin's The Phenomenon of Man Explained* Savary, Louis M.,2020 Establishes the connection between the evolutionary scientific ideas of The Human Phenomenon and the Christian spirituality and theology of The Divine Milieu *The Phenomenon of Man* Pierre Teilhard de Chardin,1976-01-13 Pierre Teilhard De Chardin was one of the most distinguished thinkers and scientists of our time He fits into no familiar category for he was at once a biologist and a paleontologist of world renown and also a Jesuit priest He applied his whole life his tremendous intellect and his great spiritual faith to building a philosophy that would reconcile Christian theology with the scientific theory of evolution to relate the facts of religious experience to those of natural science The Phenomenon of Man the first of his writings to appear in America Pierre Teilhard s most important book and contains the quintessence of his thought When published in France it was the best selling nonfiction book of the year **The Metaverse of Consciousness** Shelli Renée Joye,2025-05-20 Develops the concept of the metaverse the transcendental universe composed of additional hidden dimensions operating in parallel with space and time Integrates and maps the theories of consciousness developed by Carl Jung David Bohm Pierre Teilhard de Chardin and other scientists Offers the reader a path into the hidden dimensions through detailed maps of psyche mind and cosmos The metaverse as this wider universe is now coming to be known is rooted in one interconnected consciousness that encompasses space and time as well as previously unknown dimensions only recently detected In this book Shelli Ren e Joye Ph D offers ways in which to visualize enter and explore a multitude of these transcendent nonspatial and nontemporal states and stages of consciousness as she reveals vast webs of interlinked consciousness forming a single universal psyche Joye integrates the ideas of modern scientist philosophers who view reality as a projection of a single multidimensional consciousness Carl Jung and his concept of the psychoids Pierre Teilhard de Chardin and his vision of an integrated noosphere of consciousness and the quantum maps of consciousness developed by Karl Pribram and David Bohm The book culminates with a call to explore transcendental consciousness by developing and following our own uniquely personal paths with which we too can enter the wider dimensions of awareness in the metaverse **Religious Transhumanism and Its Critics** Arvin M. Gouw,Brian Patrick Green,Ted Peters,2022-03-10 Why do representatives of different religious traditions find the transhumanist vision of the future not only theologically compatible but even inspiring Transhumanism is a global movement seeking radical human enhancement The trans in transhumanism marks the transition from the present stage in human evolution into the future namely post human existence Containing chapters written by adherents to a variety of religious traditions Religious Transhumanism and Its Critics provides first hand testimony to the value of the transhumanist vision perceived by the

religious mind In addition the contributors critique both secular and religious transhumanism in light of realistic science and commitment to social justice **Actology** Malcolm Torry,2020-07-08 Two streams run through the Western philosophical stream one characterized by Being beings the unchanging the static and the unitary and the other by Action actions the changing the dynamic and the diverse The former might be represented by Parmenides Plato and much of what followed the latter by Heraclitus and by rather less of what followed The book explores the Action stream as it wound its way through history through Heraclitus Plato Aristotle Hegel Maurice Blondel Henri Bergson Pierre Teilhard de Chardin process philosophy and theology Geoffrey Studdert Kennedy Ludwig Wittgenstein and John Boys Smith The journey enables us to create the beginnings of an actology a way of seeing ourselves the universe and God in terms of actions in patterns rather than as beings that change Such an actology offers a complete alternative narrative far more in tune with the diverse and rapidly changing world in which we live than the ontology that has shaped philosophy theology and much else for the past two thousand years **Whitehead and Teilhard** Delio, Ilia,Davis, Andrew M.,2025-03-05 **The Philosophy of**

A More Perfect Union Linda Sargent Wood,2012-10-18 This book uncovers a holistic sensibility in post World War II American culture that challenged Cold War logic and fed some of the century s most powerful social movements This impulse is illustrated by focusing on Rachel Carson Buckminster Fuller Martin Luther King Jr Abraham Maslow Pierre Teilhard de Chardin and the Esalen Institute Teilhard de Chardin und das Zweite Vatikanische Konzil Wolfgang Klein,1975

Between Science and Religion Phillip M. Thompson,2009-01-01 This book explores the Catholic Church s engagement with science and technology in the twentieth century by focusing on the important role of four prominent Catholic intellectuals representing the diverse intellectual currents of their generation The book unpacks both the challenges and rewards of pursuing such efforts between the Modernist crisis and the Second Vatican Council This study of these intellectuals suggests how the Church moved from conflict to dialogue in its relationship with science and technology
