## **Phi In The Sky The Quest For Cosmological Scalar Fields:**

**Phi in the Sky** C.J.A.P. Martins, 2004-11-19 Particle physicists have been looking for scalar fields for a long time the Higgs field for example is crucial in the standard particle physics model but it has not been found so far Similarly cosmologists have become interested in scalar fields recently and a few tantalizing hints have surfaced in the past few years which could be viewed as direct or indirect evidence for the presence of scalar fields This workshop discussed the motivation for the existence of scalar fields in nature assessed their consequences and identified key distinguishing characteristics that might provide strong interests in the coming years Examples include the evidence for inflation in the early universe the recent claim of detection of variations of the fine structure constant and also the electron to proton mass ratio and the possible detection of a cosmic string through its gravitational effect

Rosquist, Robert T Jantzen, 2015-01-26 The Marcel Grossmann Meetings seek to further the development of the foundations and applications of Einstein's general relativity by promoting theoretical understanding in the relevant fields of physics mathematics astronomy and astrophysics and to direct future technological observational and experimental efforts The meetings discuss recent developments in classical and quantum aspects of gravity and in cosmology and relativistic astrophysics with major emphasis on mathematical foundations and physical predictions having the main objective of gathering scientists from diverse backgrounds for deepening our understanding of spacetime structure and reviewing the current state of the art in the theory observations and experiments pertinent to relativistic gravitation The range of topics is broad going from the more abstract classical theory quantum gravity branes and strings to more concrete relativistic astrophysics observations and modeling The three volumes of the proceedings of MG13 give a broad view of all aspects of gravitational physics and astrophysics from mathematical issues to recent observations and experiments The scientific program of the meeting included 33 morning plenary talks during 6 days and 75 parallel sessions over 4 afternoons Volume A contains plenary and review talks ranging from the mathematical foundations of classical and quantum gravitational theories including recent developments in string brane theories to precision tests of general relativity including progress towards the detection of gravitational waves and from supernova cosmology to relativistic astrophysics including such topics as gamma ray bursts black hole physics both in our galaxy and in active galactic nuclei in other galaxies and neutron star and pulsar astrophysics Volumes B and C include parallel sessions which touch on dark matter neutrinos X ray sources astrophysical black holes neutron stars binary systems radiative transfer accretion disks quasars gamma ray bursts supernovas alternative gravitational theories perturbations of collapsed objects analog models black hole thermodynamics numerical relativity gravitational lensing large scale structure observational cosmology early universe models and cosmic microwave background

Allen, Dimitri V.

Nanopoulos, Christopher N. Pope, 2004-12-14 The papers in this volume examine the recent revolutionary discoveries in cosmology and astronomy and their theoretical interpretation The observational evidence for an accelerating universe and an earlier decelerating phase is brought up to date with the newest results for the most distant and oldest Type Ia supernovae The data from the WMAP satellite provide for the first time true precision cosmology reliable results for the age of the universe its geometry its evolution over the past 13.7 billion years and many other features including the proportions of ordinary matter dark matter and dark energy Other papers in this volume describe the information obtained with 21st century astronomical techniques including gravitational lensing studies across the electromagnetic spectrum with ground based and NASA observatories and surveys of millions of galaxies The results are interpreted by leading theorists using both accepted and exotic theories including inflation and superstring theory      *Gravitation and Cosmology* Alfredo Macias, Claus

Giampiero Esposito, 2005-03-29 All papers were peer reviewed Research advances in gravitation and general relativity are discussed ranging from classical to quantum theories of gravity Relativistic theories have become the basic model for new research fields encompassing important experiments and observations which represent a frontier on which Einstein's theory of gravity can be tested This will provide some new insight into the field of gravitational physics The proceedings will be a valuable source for advanced graduate students and research workers at all levels      *Space Technology and Applications*

*International Forum - STAIF 2008* Mohamed S. El-Genk, 2008-01-31 As the British French and Spanish Atlantic empires were

torn apart in the Age of Revolution Portugal steadily pursued reforms to tie its American African and European territories more closely together Eventually after a period of revival and prosperity the Luso Brazilian world also succumbed to revolution which ultimately resulted in Brazil s independence from Portugal The first of its kind in the English language to examine the Portuguese Atlantic World in the period from 1750 to 1850 this book reveals that despite formal separation the links and relationships that survived the demise of empire entwined the historical trajectories of Portugal and Brazil even more deeply From constitutionalism to economic policy to the problem of slavery Portuguese and Brazilian statesmen and political writers laboured under the long shadow of empire as they sought to begin anew and forge stable post imperial orders on both sides of the Atlantic     On the importance of scalar fields for cosmology Uwe Kasper,Hans-Jürgen Schmidt,1987     *Scalar fields in cosmology* S.
