Phantom Animals:

The Imaginary of Animals Annabelle Dufourcq, 2021-07-29 This book explores the phenomenon of animal imagination and its profound power over the human imagination. It examines the structural and ethical role that the human imagination must play to provide an interface between human subjectivity and the real cognitive capacities of animals. The book offers a systematic study of the increasing importance of the metaphors, the virtual and figures in contemporary animal studies. It explores human animal and real imaginary dichotomies, revealing them to be the source of oppressive cultural structures. Through an analysis of creative, playful and theatric enactments and mimicry of animal behaviors and communication, the book establishes that human imagination is based on animal imagination. This helps redefine our traditional knowledge about animals and presents new practices and ethical concerns in regard to the animals. The book strongly contends that allowing imagination to play a role in our relation to animals will lead to the development of a more empathetic approach towards them. Drawing on works in phenomenology, contemporary animal philosophy as well as ethological evidence and biosemiotics, this book is the first to rethink the traditional philosophical concepts of imagination, images, the imaginary and reality in the light of a zoocentric perspective. It will appeal to philosophers, scholars and students in the field of animal studies as well as anyone interested in human and non human imaginations.

Keepers of the Animals Michael J. Caduto, Joseph Bruchac, 1997 Using stories to show the importance of wildlife in Native American traditions, this book gives parents and teachers an exciting way to teach children about animals.

Ghost Species James Bradley, 2020-04-28 When scientist Kate Larkin joins a secretive project to re-engineer the climate by resurrecting extinct species, she becomes enmeshed in another even more clandestine program to recreate our long lost relatives, the Neanderthals. But when the first of the children, a girl called Eve, is born, Kate finds herself torn between her duties as a scientist and her urge to protect their time lost creation. Set against the backdrop of hastening climate catastrophe, *Ghost Species* is an exquisitely beautiful and deeply affecting exploration of connection and loss in an age of planetary trauma. For as Eve grows to adulthood, she and Kate must face the question of who and what she is. Is she natural or artificial? Human or non human? And perhaps most importantly, as civilisation unravels around them, is Eve the ghost species or are we? Thrillingly original, *Ghost Species* is embedded with a deep love and understanding of the natural world.

The Spiritual Power of Masks Nigel Pennick, 2022-04-19 Reveals how mask rituals are akin to shamanic journeying and allow the mask wearer to personify an ancestral presence, spirit, deity or power. Examines animal guising and shows how mask customs are tied to creation myths and the ancestral founders of a people, tribe, city or nation. Looks at Morris dancers and mummers in the UK, Krampuslauf and Perchtenlauf in Germanic areas, the Gorgon myths of Greece, Norse Berserker rituals and the annual Black Forest rite to awaken ensouled masks every spring. There is a spiritual power in masks that transports one into realms unseen and gives voice to things unspoken. Within the context of ritual, putting on a mask places the wearer at the intersection between the present and the past, the living and the dead. This

world and the Otherworld Masks make it possible to activate ancient archetypes with the mask wearer reanimating or personifying an ancestral presence or spirit a deity or power an animal or a being of the eldritch world In this illustrated study Nigel Pennick explores the magical and spiritual aspects of mask wearing from ancient times to the present He examines the many mask traditions around Europe and shows how mask rituals are similar to shamanic journeying and near death experiences and can induce ecstatic states that allow the power signified by the mask to take possession of the individual wearing it He also looks at the practice of dressing up as sacred animals and mask wearing as it relates to ostenta events that occur suddenly and without warning that are considered a token or sign from the Otherworld Unveiling the sacred power of masks the author shows how masks allow us to transport into realms unseen embody ancestors and otherworldly entities and connect with traditions that stretch back to time immemorial *Danni Gu Collection:Soul Guardian* Danni Gu, **Work of Electricity in Nature ...** Harry B.
