Pharmacology Application In Athletic Training:

Pharmacology Application in Athletic Training Brent C Mangus, Michael G Miller, 2005-01-11 Here is the information students need to know about how drugs work and how they can affect athletic performance Through real life scenarios students gain insights into the application of pharmacology in their clinical practice from assisting an athlete who is taking a new medication to recognizing drug related side effects when a negative reaction is occurring to handling instances of drug abuse Beginning with an overview of pharmacokinetics and pharmacodynamics the text presents prescription and over the counter medications in relation to the injuries or health conditions athletic trainers commonly encounter Frequently abused substances such as amphetamines herbals and anabolic steroids are also addressed Legal and ethical issues of drug use are presented such as HIPAA mandated privacy issues drug testing and which drugs are deemed as acceptable or banned according to NCAA and US Olympic standard

Clinical Pharmacology in Athletic Training Michelle Cleary, Tom Abdenour, Mike Pavlovich, 2021-10-12 Athletic trainers have a responsibility to provide high quality pharmaceutical care while meeting both legal and ethical requirements Clinical Pharmacology in Athletic Training empowers athletic trainers with a functional understanding of pharmacology that enables them to formulate a treatment plan intended to mitigate disease and improve the overall health of their patients This text incorporates the most up to date content from the 2020 Commission on Accreditation of Athletic Training Education CAATE standards and it emphasizes interprofessional practice to enable future and current athletic trainers to collaborate with other health professionals in a manner that optimizes the quality of care Clinical Pharmacology in Athletic Training begins by addressing drug legislation and the legal aspects of the athletic trainer's role in sport medication The text provides an overview of pharmacokinetics and pharmacodynamics with an emphasis on concepts relevant to clinical practice Students are introduced to the generic and brand names general classifications and appropriate administration of drugs and are guided toward appropriate online reference materials Part II of this text describes common medications for pain inflammation and infections Part III includes medications for specific conditions including respiratory cardiovascular gastrointestinal neurological gynecological and mental health conditions The text also includes current information on opioid analgesics cannabis and cannabinoid based medications Clinical Pharmacology in Athletic Training teaches students to administer appropriate pharmacological agents for the management of the patient's condition The information includes indications contraindications dosing interactions and adverse reactions The following features are included to aid in the learning process Chapter objectives set the stage for the main topics covered in the chapter Key terms are boldfaced to indicate terms of special importance and a glossary of definitions is included at the back of the book Red Flag sidebars highlight warnings and precautions for certain medications or medicolegal issues Evidence in Pharmacology sidebars highlight recent research regarding medications Clinical Application sidebars present real life stories from the field of athletic training Case studies highlight specific therapeutic medication applications and are accompanied by

questions that prompt readers to think critically about the issues presented Quick reference drug tables describe medication types generic and brand names pronunciations common indications and other special considerations for the athletic trainer Over the past decade there has been an increased emphasis on pharmacology in athletic training Clinical Pharmacology in Athletic Training will equip students with appropriate skills and competencies prepare them to meet patient needs and enable them to work in interprofessional teams

Principles of Pharmacology for Athletic Trainers Joel Houghlum, Gary Harrelson, Teresa Seefeldt, 2024-06-01 Principles of Pharmacology for Athletic Trainers Third Edition continues the tradition of past editions to provide applications of pharmacological principles specifically aimed at the athletic trainer The drug categories that are included are primarily those that may be pertinent to the treatment of athletic injuries or that may affect athletic performance Drs Joel Houghlum Gary Harrelson and Teresa Seefeldt have taken a unique aspect to the organization and design of the Third Edition to be instructional discussions regarding the use and effects of drugs and of the disease states treated by these drug categories Additionally there is a specific discussion of the role of the athletic trainer regarding the therapeutic use and effects of these drugs Features of the Third Edition Satisfies all of the CAATE Educational Competencies on pharmacology Advanced organizers and specific learning objectives at the beginning of each chapter Summaries after each major topic within the chapter Case studies and clinical applications Discussion on popular fitness supplements Key words are in italics and defined in the glossary Concept maps present important yet complex processes in a concise graphical way Shaded textboxes throughout include additional information and are beneficial for the reader to recall a key concept addressed in an earlier chapter New ancillary materials specifically for faculty that include PowerPoint slides and test bank questions for each chapter Included with the text are online supplemental materials for faculty use in the classroom Principles of Pharmacology for Athletic Trainers Third Edition will continue to be the go to resource to determine the best pharmacological treatment strategy and management by athletic trainers
