Biochemical Pharmacology of Ethanol Edward Majchrowicz, 2013-11-11 A number of excellent symposia reviews and monographs on the biology of ethanol have been published during the last decade Although it may appear that another such publication may be superfluous the subject of alcohol abuse is still open for further exploration and the field of the biochemical pharmacology of ethanol is in its infancy This is evidenced for example by the unavailability of any drugs that are designed specifically for the treatment of alcohol intoxication or alcohol addiction The impetus for this publication was generated by a spontaneous enthusiasm following the symposium on Biochemical Pharmacology of Ethanol that was organized at the annual meeting of the American Chemical Society Division of Biological Chemistry in August 1973 in Chicago It was the first symposium on such a topic ever included in the program of that large society of American chemists The original aim of the symposium was to acquaint the members of the society with some basic facts about the biological chemistry of ethanol The symposium included seven papers and covered a relatively narrow range of ethanol biochemistry In view of the enthusiasm shown at the Chemical Society meeting the panelists decided to publish the program and to amplify it by inclusion of additional topics which have remained relatively unexplored in earlier publications In addition reviews have been included which discuss old topics from a new perspective *The Pharmacology of Alcohol and Alcohol Dependence* Henri Begleiter, Benjamin Kissin, 1996 This is a comprehensive review of the pharmacological effects of alcohol and the mechanisms underlying the pathogenesis of alcoholism The book draws on general pharmacology neuropharmacology and

alcohol studies to explore its theme The second volume in the ALCOHOL AND ALCOHOLISM series it focuses on the pharmacologic mechanisms underlying the development of alcoholism The first section on basic pharmacology is concerned with those aspects that are common to all of alcohol's effects These include pharmacokinetics general metabolism and cross tolerance The second section on neuropharmacology describes the effects of alcohol on various brain functions including circulation and metabolism The third section provides an in depth review of the neurobiology of physical dependence withdrawal and physiological tolerance The book as a whole gives a comprehensive and authoritative picture of the complex pharmacologic actions of alcohol particularly on the nervous system For clinicians and researchers in the field of alcohol and alcoholism it will serve as a fundamental reference

The Pharmacology of Alcohol Abuse Henry R Kranzler, R F Anton, H C

Becker,1994-12-23 **The Pharmacology of Alcohol Abuse** Henry R. Kranzler,2012-12-06 In recent years alcohol abuse has received increased international attention Such attention is justified by the enormous negative impact that this disorder has on health as well as on economic and social well being Governmental and other sources of research support have promoted substantial investigation into the negative consequences of alcohol examining both animal models and human subjects Consequently there has been a virtual explosion of preclinical and clinical data much of it focused on alcohol s pharmacologic effects However there have been few efforts to integrate this wealth of new information into a single manageable volume This volume provides an up to date in depth treatment of the phar macology of alcohol particularly as it relates to alcohol abuse The over riding theme of the book is the interplay between the preclinical and clinical domains Increasingly these areas of investigation have served to inform one another a trend that can be expected to grow with time The topics covered include the effects of alcohol on biological systems and the impact of medications on those effects In addition recent insights obtained from molecular biological investigations are discussed in terms of their relevance for understanding the effects of alcohol at the cellular level and the implica tions of these for the development of medications Consideration is also given to important methodological issues that influence the evaluation of medications in the context of clinical trials **Alcohol as a Drug** Charles Earl Becker,Robert L. Roe,Robert Augustine Scott,1974 **Biochemistry and Pharmacology of Ethanol** Edward Majchrowicz,1979-09-15 Alcohol abuse and alcoholism represents one of the major health social and economic issues facing not only America but much of the world Problems with alcohol appear to be a common curse afflicting almost all industrialized nations as well as the developing countries at least 10 million people suffer the misuse It is In the United States today of estimated that 205 000 individuals die prematurely each year from a variety ethanol induced factors including cirrhosis cancer heart disease suicide homi cide and highway fatalities and other accidents In purely economic terms the alcohol related cost to our society in 1975 is estimated at nearly 43 billion in lost production medical expenses motor vehicle accidents fire losses and the maintenance of social mechanisms to deal with these problems But the economic impact pales in comparision with the psychological pain and anguish brought to alcoholics and their family and friends The disease of alcoholism bears a close relation to the topic of our dedication for it is equally insidious and sadistic it destroys humanity and rational thought and it brings terror pain and death **Social Actions Technician (drugs/alcohol) (AFSC 73470 B)** S. John Gallardo,1984 **A Textbook of Pharmacology** Arthur Dermont Bush,1927 **Drugs and Alcohol** Kenneth Lamar Jones,Louis W. Shainberg,Curtis O.
