Phenomenology Dialogues And Bridges:

Phenomenology Ronald Bruzina, Bruce Wilshire, 1983-06-30 The connecting of issues that have been heretofore largely kept separate is the thrust of the articles assembled here From an article by a noted Continental thinker on the interrelation of phenomenology and pragmatism to articles on the phenomenological powers of theater this book features such established thinkers as Paul Ricoeur Hans Georg Gadamer Otto Poggeler Don Ihde James Edie Marjorie Grene Eugene Gendlin and Karl Otto Apel speaking in innovative ways There is extensive discussion of the life and thought of Martin Heidegger an examination of the connection between phenomenology and the thought of Meinong and an exposition of several of Merleau Ponty's central issues A section of the book deals with the problems of the connections between phenomenology and the theory of natural science This volume advances the interchange between American and Continental thinkers through novel and provocative dialogue *Phenomenology of Natural Science* L. Hardy, Lester Embree, 2012-12-06

Contemporary philosophy seems a great swirling almost chaos Every situation must seem so at the time probably because philosophy itself resists structuration and because personal and political factors within as well as without the discipline must fade in order for the genuinely philosophical merits of performances to be assessed Nevertheless some remarks can still be made to situate the present volume For example at least half of philosophy on planet Earth is today pursued in North America which is not to say that this portion is any less internally incoherent than the whole of which it thus becomes the largest part and the present volume is North American Incidentally the recognition of culturally geographic traditions and tendencies now implies that striving for cross cultural if not trans cultural philosophical validity has failed or ceased Rather it merely recognizes a significant aspect relevant from the historical point of view Episteme Aesthetics Ethics Etc mology Analytic Philosophy Marxism Existentialism Etc Figure 1 There are two main ways in which philosophical developments are classified One is in terms of tendencies movements and schools of thought and the other is in terms of traditional sub disciplines When there is little contention among schools the predominant way is in terms of sub disciplines such as aesthetics ethics politics etc Today this mode of classification can be seen to intersect with that in terms of movements and tendencies both of which are represented in the above chart *Logos of Phenomenology and Phenomenology of the Logos. Book One* Anna-Teresa Tymieniecka, 2006-06-30 During its century long unfolding spreading in numerous directions Husserlian phenomenology while loosening inner articulations has nevertheless maintained a somewhat consistent profile As we see in this collection the numerous conceptions and theories advanced in the various phases of reinterpretations have remained identifiable with phenomenology What conveys this consistency in virtue of which innumerable types of inquiry scientific social artistic literary may consider themselves phenomenological Is it not the quintessence of the phenomenological quest namely our seeking to reach the very foundations of reality at all its constitutive levels by pursuing its logos Inquiring into the logos of the phenomenological quest we discover indeed all the main constitutive spheres of

reality and of the human subject involved in it and concurrently the logos itself comes to light in the radiation of its force

Tymieniecka Edmund Husserl: The cutting edge : phenomenological method, philosophical logic, ontology, and philosophy of science Rudolf Bernet, Donn Welton, Gina Zavota, 2005 This collection makes available in one place the very best essays on the founding father of phenomenology reprinting key writings on Husserl's thought from the past seventy years It draws together a range of writings many otherwise inaccessible that have been recognized as seminal contributions not only to an understanding of this great philosopher but also to the development of his phenomenology The four volumes are arranged as follows Volume I Classic essays from Husserl's assistants students and earlier interlocutors Including a selection of papers from such figures as Heidegger Merleau Ponty Sartre Ricoeur and Levinas Volume II Classic commentaries on Husserl's published works Covering the Logical Investigations Ideas I Phenomenology of Internal Time Consciousness and Formal and Transcendental Logic Volumes III and IV Papers concentrating on particular aspects of Husserl's theory including Husserl's account of mathematics and logic his theory of science the nature of phenomenological reduction his account of perception and language the theory of space and time his phenomenology of imagination and empathy the concept of the life world and his epistemology

Phenomenology and Skepticism Brice R. Wachterhauser,1996 This volume of essays honors the extensive contributions of James M Edie the founding editor of the Studies in Phenomenology and Existential Philosophy series to the development of phenomenological thought Grounded in Edie s emphasis on Husserl s confrontation with skepticism the essays provide an in depth analysis of Husserlian and neo Husserlian responses to skepticism and relativism Led by an informative introduction by the volume editor Brice R Wachterhauser and featuring essays by thirteen contributors including Edie himself this volume confirms both Edie s lasting influence and the continued relevance of Husserlian thought in contemporary philosophical debate
