Howell, 2011-11-17 Ideal for courses in consciousness and the philosophy of mind *Consciousness and The Mind Body Problem* A Reader presents thirty three classic and contemporary readings organized into five sections that cover the major issues in this debate the challenge for physicalism physicalist responses alternative responses the significance of ignorance and mental causation Edited by Torin Alter and Robert J Howell the volume features work from such leading figures as Karen Bennett Ned Block David J Chalmers Frank Jackson Colin McGinn David Papineau and many others *The Philosophy of Science* Sahotra Sarkar, Jessica Pfeifer, 2006 The first in depth reference to the field that combines scientific knowledge with philosophical inquiry this encyclopedia brings together a team of leading scholars to provide nearly 150 entries on the essential concepts in the philosophy of science The areas covered include biology chemistry epistemology and metaphysics physics psychology and mind the social sciences and key figures in the combined studies of science and philosophy Midwest **Current Issues in Philosophy of Mind** Anthony O'Hear, 1998 *Contemporary Issues in Philosophy of Mind* brings together leading figures in the area from Britain and the US who lay out their thoughts on key issues in an accessible way **Natur und Freiheit** Violetta L. Waibel, Margit Ruffing, David Wagner, 2018-11-05 Die Kongressakten des 12 Internationalen Kant Kongresses der im Jahr des 650 Jahrbil ums der Universit t Wien zum Thema Natur und Freiheit vom 21 25 September 2015 an der Universit t Wien stattgefunden hat versammeln die Ergebnisse dieses Kongresses Mit dem Thema Natur und Freiheit wurde zwei tragenden Begriffen des Kritischen Werks Kants Rechnung getragen Kants Philosophie wird bis heute weltweit diskutiert was sich auch in den Teilnehmerinnen und Teilnehmern des Kongresses spiegelte Gleichwohl wurden und werden immer wieder Zweifel an der Berechtigung einer Philosophie der Freiheit laut wie sie insbesondere f r Kants Moralphilosophie grundlegend ist Spannung und Balance von Natur und Freiheit galt es erneut zu diskutieren berdies sollte am Ort des Kongresses in Wien der in der Vergangenheit br chigen von Vorbehalten bestimmten Auseinandersetzung mit Immanuel Kant in sterreich durch neue Untersuchungen Aufmerksamkeit geschenkt werden Der Kongress hat die Bedeutung Kants f r die heutige internationale Philosophie erneut unterstrichen Es konnten aber auch die historischen Filiationen der Philosophie Kants f r Wien und sterreich herausgearbeitet und einer neuen Sichtung unterzogen werden *What Am I?* Joseph Almog, 2005 This book articulates and defends Descartes s dual key project the separation of human mind and body as distinct substances and their integration into a single human being The central challenge faced by Descartes s dualism is the prove too much prove too little dilemma too keen a separation of mind and body gets in the way of reuniting them into a full bloodied real human subject whereas emphasizing the primality of the full human being is not enough to preserve the distinctness of mind and body as separate complete substances **The Mind-Body Problem** Jonathan Westphal, 2016-09-30 An introduction to the mind body problem covering all the proposed solutions and offering a powerful new one Philosophers from Descartes to Kripke have struggled with the glittering prize of modern and contemporary philosophy the mind body problem The brain is

physical If the mind is physical we cannot see how If we cannot see how the mind is physical we cannot see how it can interact with the body And if the mind is not physical it cannot interact with the body Or so it seems In this book the philosopher Jonathan Westphal examines the mind body problem in detail laying out the reasoning behind the solutions that have been offered in the past and presenting his own proposal The sharp focus on the mind body problem a problem that is not about the self or consciousness or the soul or anything other than the mind and the body helps clarify both problem and solutions Westphal outlines the history of the mind body problem beginning with Descartes He describes mind body dualism which claims that the mind and the body are two different and separate things nonphysical and physical and he also examines physicalist theories of mind antimaterialism which proposes limits to physicalism and introduces the idea of qualia and scientific theories of consciousness Finally Westphal examines the largely forgotten neutral monist theories of mind and body held by Ernst Mach William James and Bertrand Russell which attempt neither to extract mind from matter nor to dissolve matter into mind Westphal proposes his own version of neutral monism This version is unique among neutral monist theories in offering an account of mind body interaction

**The Philosophy of Psychiatry and Biologism** Markus Rütger, Bettina Schoene-Seifert, Marco Stier, Sebastian Muders, 2014-12-03 There has been an ongoing debate about the capabilities and limits of the bio natural sciences as sources and the methodological measure in the philosophy of psychiatry for quite some time now Still many problems remain unsolved at least partly for the following reasons The opposing parties do not tend to speak with each other exchange their arguments and try to increase mutual understanding Rather one gets the impression that they often remain in their trenches busy with confirming each others opinions and developing their positions in isolation This leads to several shortcomings 1 Good arguments and insights from both sides of the debate get less attention they deserve 2 The further improvement of each position becomes harder without criticism genuinely motivated by the opposing standpoint 3 The debate is not going to stop at least not in the way it would finish after a suggested solution finds broad support 4 Related to this insisting on the ultimate aptness of one side is just plainly wrong in almost every case Since undeniably most philosophical positions usually have a grain of truth hidden in them In sum many controversies persist with regard to the appropriate methodological epistemological and even ontological level for psychiatric explanation and therapies In a conference which took place in December last year we tried to contribute to a better understanding about what really is at issue in the philosophy of psychiatry We asked for a common basis for several sides for points of divergence and for the practical impact of different solutions on everyday work in psychiatry Since psychiatry as a whole is a subject that is too wide to be covered in a single meeting we focused on the following four core topics 1 Competing accounts of psychiatric biologism reductionism and physicalism 2 Mental disease and brain disease in the light of current neuroscientific and epigenetic findings 3 Normative suppositions for different accounts of mental disease 4 Normative implications of different accounts of mental disease These topics which have been vigorously as well as fruitfully discussed at our conference will

ideally be too in the center of our contribution to Frontiers More precisely we think of arranging a research topic which assembles the issues of the conference At this point it seems promising to us to group three or four Target Articles TA and let them get criticized by a couple of commentaries from different angles to give the issue a much broader and detailed perspective
