Probabilistic Reasoning In Multiagent Systems A Graphical Models Approach:

Probabilistic Reasoning in Multiagent Systems Yang Xiang, 2002-08-26 This 2002 book investigates the opportunities in building intelligent decision support systems offered by multi agent distributed probabilistic reasoning Probabilistic reasoning with graphical models also known as Bayesian networks or belief networks has become increasingly an active field of research and practice in artificial intelligence operations research and statistics The success of this technique in modeling intelligent decision support systems under the centralized and single agent paradigm has been striking Yang Xiang extends graphical dependence models to the distributed and multi agent paradigm He identifies the major technical challenges involved in such an endeavor and presents the results The framework developed in the book allows distributed representation of uncertain knowledge on a large and complex environment embedded in multiple cooperative agents and effective exact and distributed probabilistic inference

Soft Computing in Ontologies and Semantic Web Zongmin Ma, 2007-08-13 This book covers in a great depth the fast growing topic of tools techniques and applications of soft computing e g fuzzy logic genetic algorithms neural networks rough sets Bayesian networks and other probabilistic techniques in the ontologies and Semantic Web How components of the Semantic Web like the RDF Description Logics ontologies can be covered with a soft computing focus is shown The book aims to provide a single account of current studies in soft computing approaches to the ontologies and the Semantic Web The objective of the book is to provide the state of the art information to researchers practitioners and graduate students of the Web intelligence and at the same time serving the information technology professional faced with non traditional applications that make the application of conventional approaches difficult or impossible
