Hall,2010-08-18 This volume contains a collection of papers by economists which examine the various strategies for cutting costs and improving productivity in higher education in the United States The dramatic increase in the cost of attending most colleges and universities in recent years has led to increasing concerns regarding college affordability In addition with nearly 35 percent of full time college students failing to receive a bachelor s degree within six years of enrolling in an institution of higher education the productivity of colleges and universities has also been called into question Systematic reform of higher education has intensified as a result of the large amount of public and private dollars flowing into it The chapters in this volume while recognizing it may be the primary source of the problem also understand that the political forces behind the subsidization of higher education are unlikely to wane The contributors examine several areas of possible reform from an economic perspective including financial aid systems athletics and the organization of universities and university systems

with an emphasis on identifying the types of reforms that are most likely to result in improvements as well as those that may make things worse This volume will be of interest to economists education researchers and policymakers concerned with education reform *The Ambiguous Foreign Policy of the United States toward the Muslim World* David S. Oualaalou,2016-03-07 This book sheds light on key issues in the Middle East As the politics and society of the Middle East change American foreign policy has become stagnant and stubborn However the changes occurring in the Middle East have brought into existence new unfamiliar policies from regimes that reject old alliances and demand new solutions Ongoing civil war in Syria chaos in Yemen and the recent conquests of ISIS have changed geopolitical calculations in the region for everyone concerned However American foreign policy lacks the vision to predict the consequences of such changes The United States needs a major change in approach if it is to maintain both its leadership and credibility in the Muslim world The political leadership in Washington na vely and unrealistically assumes that it can impose its style of governance and way of thinking to make the Muslim world secular and democratic based on Western values This work constructively criticizes and objectively analyzes the present American political strategy to make possible an honest national debate about American foreign policy toward the Muslim world This book questions the judgment of American foreign policymakers and argues the United States has no coherent policy in place to address ongoing challenges It highlights the need for creative thinking flexibility systematic understanding cultural awareness and effective strategy [Chronicle Financial Aid Guide](#) Chronicle Guidance Publications, inc,2004-09 **Reauthorization on the Higher Education Act of 1965** United States.
