Impact Keith V. Lucas,2025-08-19 Impact explores the people and culture teams need for sustained innovation and problem solving This transformative guide is aimed at leaders who have earned their roles through subject matter expertise a capacity for impact and innate leadership skills and who now face the challenge of building innovative teams This is the high impact engineer turned manager or the rising scientist turned lab director or the founding startup executive Subject matter proficiency and leadership intuition can initially take leaders far but team performance ultimately hits a wall when leaders lack team building expertise Impact guides individuals across the leadership spectrum from the new player coach to the seasoned team builder helping them sidestep common scaling pitfalls such as diminished team impact lower productivity culture dilution disempowerment and loss of focus It presents a two tiered framework that examines culture as a system and leadership as a discipline The first tier offers team wide practices to drive focus cultivate alignment and unlock collective brainpower and horsepower The second tier provides individual centered practices to ensure the team hires promotes and retains those most likely to contribute to the mission Drawing from Keith V Lucas s direct experience in building teams and advising startups Impacts offers practical insights for effective team building and leadership

Boom Byrne Hobart,Tobias Huber,2024-11-19 A timely investigation of the causes of technological and scientific stagnation and a radical blueprint for accelerating innovation Read this book for the alternative history of our age Peter Thiel investor and author of Zero to One A must read for those who seek to build the future Marc Andreessen

cofounder of Netscape and Andreessen Horowitz From the Moon landing to the dawning of the atomic age the decades prior to the 1970s were characterized by the routine invention of transformative technologies at breakneck speed By comparison ours is an age of stagnation Median wage growth has slowed inequality and income concentration are on the rise and scientific research has become increasingly expensive and incremental Why are we unable to replicate the rate of progress of past decades What can we do to reinvigorate innovation In Boom Byrne Hobart and Tobias Huber take an inductive approach to the problem In a series of case studies tracking some of the most significant breakthroughs of the past 100 years from the Manhattan Project and the Apollo program to fracking and Bitcoin they reverse engineer how transformative progress arises from small groups with a unified vision vast funding and surprisingly poor accountability They conclude that financial bubbles while often maligned as destructive and destabilizing forces have in fact been the engine of past breakthroughs and will drive future advances In other words Bubbles aren't all bad Integrating insights from economics philosophy and history Boom identifies the root causes of the Great Stagnation and provides a blueprint for accelerating innovation By decreasing collective risk aversion overfunding experimental processes and organizing high agency individuals around a transcendent mission bubbles are the key to realizing a future that is radically different from the present Boom offers a definite and optimistic vision of our future and a path to unleash a new era of global prosperity
