Parenting in a Digital World Catherine Page Jeffery, 2025-03-17 This book focuses on the challenges of parenting in the digital age providing a counter narrative to and critique of risk and cyber safety narratives as well as some suggestions for a way forward Drawing on qualitative research with Australian families this book explores the knowledges practices anxieties and lived experiences of families themselves It demonstrates that the realities of family life in the digital age are more complex than the headlines and cyber safety advice would have us believe as parents grapple with balancing their own anxieties and social expectations about what it means to be a good parent with the practices desires and rights of their child It addresses key questions including How much attention should we pay to media headlines about the dangers of contemporary media What is actually worrying Australian parents and how do they address these concerns Why do young people love media so much How capable are young people of actually managing online risk What is the right way to parent in the digital age to ensure young people's safety and wellbeing while minimising family conflict Aimed at media studies scholars and students as well as parents and policy makers seeking a more comprehensive understanding of the broader academic research surrounding young people media and parenting this book argues that parent and child knowledges practices and experiences must be better accounted for within the online safety ecosystem as well as in policy development and that families need encouragement and guidance to help them adopt more democratic approaches to parenting in the digital age

A Fortified Far Right? Katalin Petho-Kiss, Rohan Gunaratna, 2024-04-30 Petho Kiss and Gunaratna understand the nature of the threat posed by the far right because of their findings and they propose effective provisions and mechanisms for detecting and countering

it The book undertakes a consistent procession and empirical examination of available information to arrive at the recognition that in order to dissolve the complexity of the associated threat we need to scrutinize the functioning of far right threat groups In depth and consistent analysis on their mode of operation and mindset enables us to identify ways to detect and counter their malicious efforts and activities The theoretical framework for the analysis lies upon the concept of wave theory The main question that this book examines is whether far right terrorism constitutes a new wave of global terrorism One question emerges from this statement that requires further elaboration Is far right terrorism a novel wave of terrorism If yes how is it novel and what are the novelties or developments in it This book is for scholars as well as practitioners in the counter terrorism CT and the prevention countering violent extremism PCVE field Through specific case studies students studying CT and or PCVE could gain insight into the operational functionalities of far right threat groups This may help them to get a more accurate understanding of the threat posed by these entities Examining the recruitment funding communication practices and modus operandi of worrisome threat actors equips us to design the most effective countermeasures and identify the hiatuses in applicable legislative regimes

Playful Pedagogy in the Pandemic Emily K. Johnson,Anastasia Salter,2022-08-26 Educational technology adoption is more widespread than ever in the wake of COVID 19 as corporations have commodified student engagement in makeshift packages marketed as gamification This book seeks to create a space for playful learning in higher education asserting the need for a pedagogy of care and engagement as well as collaboration with students to help us reimagine education outside of prescriptive educational technology Virtual learning has turned the course management system into the classroom and business platforms for streaming video have become awkward substitutions for lecture and discussion Gaming once heralded as a potential tool for rethinking our relationship with educational technology is now inextricably linked in our collective understanding to challenges of misogyny white supremacy and the circulation of misinformation The initial promise of games based learning seems to linger only as gamification a form of structuring that creates mechanisms and incentives but limits opportunity for play As higher education teeters on the brink of unprecedented crisis this book proclaims the urgent need to

find a space for playful learning and to find new inspiration in the platforms and interventions of personal gaming and in turn restructure the corporatized surveilling classroom of a gamified world Through an in depth analysis of the challenges and opportunities presented by pandemic pedagogy this book reveals the conditions that led to the widespread failure of adoption of games based learning and offers a model of hope for a future driven by new tools and platforms for personal experimental game making as intellectual inquiry
