successful 8 per cent struggle to make slow progress and 90 per cent fail The reason for this could be that such people are only focusing on their profit rather than looking at customer satisfaction as a core business principle Sometimes they don't even do any market survey as to why customers should buy their product or service Some venture into business with some basic concepts a few look at business options to achieve their comfort zones while some might look at business opportunities as prestige issues It goes without saying that such people will certainly fail in their business sooner than later The author has decided to share his Experience and Business Knowledge with the upcoming Entrepreneurs through this book after careful analysis so that young Entrepreneurs don't face similar problems in their Business but to begin with the confidence and solutions that are already derived from the years of experience
