The Sexual Offences Act 2003 and

Virtual Reality Rhiannon Procktor, 2025-11-23 This book investigates online sexual interaction and its place within the law. Though this question is not new, the technological landscape is evolving rapidly enough to warrant further analysis. We are witnessing an explosion of virtual and augmented reality technology which outpaces legal development. Relying on multidisciplinary research from computer scientists, psychologists, philosophers, lawyers, and engineers, this book explores the place of sexual wrongdoing and justice in this virtual new world. As an example, it will focus on the provisions of the Sexual Offences Act 2003, the challenges surrounding physical touch, and the ambiguity surrounding gender, deception, and consent in a virtual future.

Regulating the Metaverse Ignas Kalpokas, Julija Kalpokienė, 2023-01-26 The metaverse seems to be on everybody's lips, and yet very few people can actually explain what it means or why it is important. This book aims to fill the gap from an interdisciplinary perspective informed by law and media and communications studies. Going beyond the optimism emanating from technology companies and venture capitalists, the authors critically evaluate the antecedents and the building blocks of the metaverse, the design and regulatory challenges that need to be solved, and commercial opportunities that are yet to be fully realised. While the metaverse is poised to open new possibilities and perspectives, it will also be a dangerous place, ripe with threats ranging from disinformation to intellectual property theft to sexual harassment. Hence, the book offers a useful guide to the legal and political governance issues ahead while also contextualising them within the broader domain of governance and regulation of digital technologies.

The New Age of Sexism Laura Bates, 2025-05-15 Laura Bates explains how they built the future and forgot to put women in it. CAITLIN MORAN Fascinating and essential. I urge you to read every syllable. JO BRAND All men must read this book if they have any interest in a truly just, fair, and equal society. ROBIN INCE AI is here bringing a seismic shift in the way our society operates. Might this mean a future reimagined on equitable terms for women and marginalised groups everywhere? Not unless we fight for it. At present, power remains largely in the hands of a few rich white men. New AI-driven technologies with misogyny baked into their design are putting women in danger; their rights and safety sacrificed at the altar of profitability and reckless speed. In *The New Age of Sexism*, Sunday Times bestselling author and campaigner Laura Bates takes us deep into the heart of this rapidly evolving world. She explores the metaverse, confronts deepfake pornography, travels to cyber brothels, tests chatbots, and hears from schools in the grip of online sexual abuse, showing how our lives from education to work, sex to entertainment are being infiltrated by easily accessible technologies that are changing the way we live and love. What she finds is a wild west where existing forms of discrimination, inequality, and harassment are being coded into the future we will all have little choice about living in, unless we seize this moment to demand change. Gripping, courageous, and eye-opening, *The New Age of Sexism* exposes a phenomenon we can't afford to ignore any longer. Our future is on the line. We need to act now, before it is too late. Urgent reading for anyone who is interested in the intersection of tech and gender equality, and indeed anyone who wants to be a part of building a better future free from misogyny. EMMA LOUISE BOYNTON A brilliantly researched, incredibly

illuminating and frequently chilling account of the next chapter in tech's ongoing assault on our core values. A chapter that is already unfolding around us all. JAMES O BRIEN Collins International Lower Secondary Computing - International Lower Secondary Computing Teacher's Guide: Stage 7 Dr Tracy Gardner, Liz Smart, Rebecca Franks, 2024-11-29 Collins International Lower Secondary Computing series provides in-depth coverage of the Cambridge curriculum frameworks Lower Secondary Computing 0860 and Lower Secondary Digital Literacy 0082 as well as the UK national curriculum for Computing at secondary level. The course is organised around six themes relating to computing and digital literacy: Our digital world, Content creation, Create with code, How computers work, Connect the world, The power of data. The chapter overviews and lesson summaries show how these themes are developed in Stage 7, helping teachers to plan their course. The Teacher's Guide offers a detailed lesson plan for every unit, giving guidance on how to run the session, including lesson objectives, reference to key pedagogies, mapping grids, worksheets, resource sheets, answers, support for assessing end-of-chapter projects, and Build on this extension activities. The lesson plans and introduction provide valuable subject knowledge and support for non-specialists. This includes summaries of the key computing pedagogies used in the resources and references to further reading to develop teachers' own practice. Built around an internationally sound pedagogy, this framework for teaching provides real-life contexts and culturally responsive examples into a project-based approach and incorporates all learners' knowledge, ways of learning, and heritage, where learners are given more of an opportunity to choose appropriate contexts for themselves. The accompanying downloads available on the Collins site include PDF and editable Word versions of all the resources in the Teacher's Guide to print and adapt, as well as source files, mapping grids, worksheets, resource sheets, and recommended sites to support practical tasks, with a host of resources to supplement teaching. Written by Flip Computing, a team of female experts who have a breadth of computing experience across industry, education, and research, and their culturally responsive approach provides teachers with an accessible and inclusive learning experience for all ages and inspires greater participation and tech career pathways for all.
