

A vibrant, cartoonish Roblox game scene. In the center, a character with a brown hat and a red floral shirt is holding a large, wrapped gift. To the right, a yellow dog is jumping. In the background, a grey cat is visible on a green hill. A small red and white striped house is on the right. The scene is set against a bright blue sky with green hills and a large, stylized tree.

**Educational Metaverse Pocket Edition** Francisco Tupy, Helena Poças Leitão, 2023-05-08 We are entering into the next great world technological revolution The metaverse is a virtual world that replicates reality seeking to expand social connections In the very near future the boundaries between the physical and the virtual will slowly dissolve In the metaverse we will be able to go to work attend concerts meet friends study and do practically everything else we currently do in the physical world This book explores concepts reflections examples of use platforms applications devices new marketing techniques pedagogical activities and many other contents related to this new virtual world seeking to introduce education professionals to a subject that despite still being so controversial is extremely important for our understanding of the future

Infrastructures of Reality: Metaverse Stories, Spaces, Bodies Chris Hesselbein, Paolo Bory, 2025-08-09 This open access book focuses on two dimensions of the development of the metaverse that are crucial to reality namely spatiality and embodiment Metaversal technologies are thought to fundamentally affect both our spaces and bodies which are two central aspects of the constitution of social reality Both spatiality and embodiment are core elements of world making that are being pulled into the ambit of metaversal projects On the one hand metaversal technologies are profoundly spatial in the sense that they render space in virtual form or overlay digital layers onto pre existing physical spaces On the other hand metaversal technologies are directly geared towards the body in that they not only seek to extend or expand our embodied senses and emplace our bodies in virtual spaces but they also seek to capture their behaviours and actions on a far more granular level This can create new opportunities in terms of work social interaction and leisure but can also open our bodies up to new tech driven interventions and control Whether in the form of VR or AR such technologies not only reproduce space but also rely on making spaces more legible and open to automated interventions Taken together the metaversification of spaces and bodies gives rise to crucial questions about the goals and implications of metaversal developments by large technology companies and about the relationship between the developments of the metaverse and AI systems Drawing on our combined background and expertise in Science and Technology Studies and the History of Media and Communication we critically analyse the development of metaversal technologies and platforms by discussing a broad set of developments and examples from a wide range of technology and gaming companies Written in clear concise and accessible language and combining and applying novel theoretical frameworks and concepts to a currently emergent phenomenon this book will find a large audience not only within academic and professional circles but also in popular culture
