Advances in Social Science Research Using R Hrishikesh D. Vinod, 2009-12-24 Quantitative social science research has been expanding due to the availability of computers and data over the past few decades Yet the textbooks and supplements for researchers do not adequately highlight the revolution created by the R software 2 and graphics system R is fast becoming the lingua franca of quantitative research with some 2000 free specialized packages where the latest versions can be downloaded in seconds Many packages such as car 1 developed by social scientists are popular among all scientists An early 2009 article 3 in the New York Times notes that statisticians engineers and scientists without computer programming skills find R easy to use A common language R can readily promote deeper mutual respect and understanding of unique problems facing quantitative work in various social sciences Often the solutions developed in one field can be extended and used in many fields This book promotes just such exchange of ideas across many social sciences Since Springer has played a leadership role in promoting R we are fortunate to have Springer publish this book A Conference on Quantitative Social Science Research Using R was held in New York City at the Lincoln Center campus of Fordham University June 18 19 2009 This book contains selected papers presented at the conference representing the Proceedings of the conference *BOINC* Christian Benjamin Ries, 2012-05-31 Mit BOINC können hochskalierbare komplexe und rechenintensive Probleme im Sinne des Public Resource Computing PRC Prinzips gelöst werden Freiwillige melden sich bei einem BOINC Projekt an und stellen ihre Rechnerressourcen zur Verfügung BOINC unterstützt alle gängigen Betriebssysteme und auch alle Exoten Dies hat seinen Preis Die Installation Konfiguration und Wartung eines BOINC Projekts ist aufwendig kompliziert und sehr fehleranfällig In vier Teilen Grundlagen Technik BOINC Praxis stellt der Autor die einzelnen Entwicklungsschritte dar so dass erfolgreich ein voll funktionsfähiges BOINC Projekt erstellt und effizient gewartet werden kann Es wird besonders auf die verschiedenen Implementierungsmöglichkeiten Wert gelegt um eine heterogene Umgebung auf Anwenderseite für die Lösung der Probleme nutzen zu können Reale Praxisbeispiele runden das Buch ab *The Kerbal Player's Guide* Jon Manning, Tim Nugent, Paul Fenwick, Alasdair Allan, Paris Buttfield-Addison, 2016-11-10 Kerbal Space Program KSP is a critically acclaimed bestselling space flight simulator game It's making waves everywhere from mainstream media to the actual space flight industry but it has a bit of a learning curve In this book five KSP nerds including an astrophysicist teach you everything you need to know to get a nation of tiny green people into space KSP is incredibly realistic When running your space program you'll have to consider delta V budgets orbital mechanics Hohmann transfers and more This book is perfect for video game players simulation game players Minecrafters and amateur astronomers Design launch and fly interplanetary rockets Capture an asteroid and fly it into a parking orbit Travel to distant planets and plant a flag Build a moon rover and jump off a crater ridge Rescue a crew mate trapped in deep space *Data and computation modeling for scientific problem solving environments*, **Big Science, Innovation, and Societal Contributions** Shantha Liyanage, Markus Nordberg, Marilena

Streit-Bianchi,2024 Big Science Innovation and Societal Contributions offers a connection between Big Science and its societal impacts from a multidisciplinary perspective drawing on physics and astrophysics scholars to explain the reasoning behind their work and how such knowledge can be applied to everyday life Through simplifying complex scientific concepts Big Science Innovation and Societal Contributions explains the evolution of Big Science experiments and what it takes to manage and maintain complex scientific experiments with a human centred approach Further it examines the motivations behind international efforts to develop capital intensive and human resource rich large scale multi national scientific investments to solve fundamental research problems concerning our future Drawing on reliable scientific evidence multi disciplinary perspectives and personal insights from collider physics detectors accelerator and telescopes research the volume outlines the mechanisms benefits and methodologies as well as the potential challenges and short comings of Big Science to learn and reflect on for future initiatives This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations

Recapturing a Future for Space Exploration National Research Council,Division on Engineering and Physical Sciences,Aeronautics and Space Engineering Board,Space Studies Board,Committee for the Decadal Survey on Biological and Physical Sciences in Space,2012-01-30 More than four decades have passed since a human first set foot on the Moon Great strides have been made in our understanding of what is required to support an enduring human presence in space as evidenced by progressively more advanced orbiting human outposts culminating in the current International Space Station ISS However of the more than 500 humans who have so far ventured into space most have gone only as far as near Earth orbit and none have traveled beyond the orbit of the Moon Achieving humans further progress into the solar system had proved far more difficult than imagined in the heady days of the Apollo missions but the potential rewards remain substantial During its more than 50 year history NASA s success in human space exploration has depended on the agency s ability to effectively address a wide range of biomedical engineering physical science and related obstacles an achievement made possible by NASA s strong and productive commitments to life and physical sciences research for human space exploration and by its use of human space exploration infrastructures for scientific discovery The Committee for the Decadal Survey of Biological and Physical Sciences acknowledges the many achievements of NASA which are all the more remarkable given budgetary challenges and changing directions within the agency In the past decade however a consequence of those challenges has been a life and physical sciences research program that was dramatically reduced in both scale and scope with the result that the agency is poorly positioned to take full advantage of the scientific opportunities offered by the now fully equipped and staffed ISS laboratory or to effectively

pursue the scientific research needed to support the development of advanced human exploration capabilities Although its review has left it deeply concerned about the current state of NASA s life and physical sciences research the Committee for the Decadal Survey on Biological and Physical Sciences in Space is nevertheless convinced that a focused science and engineering program can achieve successes that will bring the space community the U S public and policymakers to an understanding that we are ready for the next significant phase of human space exploration The goal of this report is to lay out steps and develop a forward looking portfolio of research that will provide the basis for recapturing the excitement and value of human spaceflight thereby enabling the U S space program to deliver on new exploration initiatives that serve the nation excite the public and place the United States again at the forefront of space exploration for the global good
