Antimonopoly and American Democracy Daniel A. Crane, William J. Novak, 2023 Americans today worry about concentrated power in private industry to an extent not seen in generations Not only do they find diminished diversity of service providers and producers but they are disquieted by the power of a few large companies to shape and constrain democratic processes Americans across the political spectrum from former President Donald Trump to Massachusetts Senator Elizabeth Warren have sounded alarms about the overlarge power of business in both public and private life While many of the technologies and industries that worry Americans are new the concerns they've raised are not unprecedented *Antimonopoly and American Democracy* traces the history of antimonopoly politics in the United States arguing that organized action against concentrated economic power comprises an important American democratic tradition While prevailing narratives tend to treat monopoly as a risk to people mainly in their roles as consumers by causing prices to increase for example this study broadens the conversation recounting ways in which monopolism can hurt ordinary people without directly impacting their wallets From the pre revolutionary era to the age of Big Tech the volume explores the effects that historical monopolies have had on democracy by using their wealth and influence to dominate electoral politics and regulation Chapters also highlight a range of sites of economic concentration from land ownership to media reach and attempts at combating them from labor organizing to constitutional revision Featuring original scholarship from some of the world's leading experts in American economic political and legal history *Antimonopoly and American Democracy* offers important lessons for our contemporary political moment in which fears of concentrated wealth and influence are again on the rise

The AOC Way Caroline Fredrickson, 2020-01-07 Understanding and applying the wisdom of Congresswoman Alexandria Ocasio Cortez In an incredibly short time Alexandria Ocasio Cortez has galvanized the country on issues of national importance This young member of Congress has motivated Democrats to confront climate change and income inequality and is upending conventional wisdom about how young women especially women of color are supposed to behave Her background including a family that fell out of the middle class due to health care challenges has driven her to champion those on the margins such as low wage workers immigrants people of color and younger people who face a future of climate disruption and instability This book takes life lessons from the rising star known as AOC and offers readers a chance to apply them to their own lives In five chapters *The AOC Way* weaves substantive issues and AOC's experiences to understand how

she so quickly came to dominate media coverage in America but also to drive real change in what seems like a lightening flash AOC has demonstrated some key values and commitments on her way to success such as believing in yourself and not letting haters take you off course working hard and being prepared to prove your talents bringing your experiences to your work by not forgetting how you got where you are challenging the status quo and staying true to your friends and allies

Saving Capitalism Robert B. Reich, 2015-09-29 From the author of *Aftershock* and *The Work of Nations* his most important book to date a myth shattering breakdown of how the economic system that helped make America so strong is now failing us and what it will take to fix it Perhaps no one is better acquainted with the intersection of economics and politics than Robert B Reich and now he reveals how power and influence have created a new American oligarchy a shrinking middle class and the greatest income inequality and wealth disparity in eighty years He makes clear how centrally problematic our veneration of the free market is and how it has masked the power of moneyed interests to tilt the market to their benefit Reich exposes the falsehoods that have been bolstered by the corruption of our democracy by huge corporations and the revolving door between Washington and Wall Street that all workers are paid what they re worth that a higher minimum wage equals fewer jobs and that corporations must serve shareholders before employees He shows that the critical choices ahead are not about the size of government but about who government is for that we must choose not between a free market and big government but between a market organized for broadly based prosperity and one designed to deliver the most gains to the top Ever the pragmatist ever the optimist Reich sees hope for reversing our slide toward inequality and diminished opportunity when we shore up the countervailing power of everyone else Passionate yet practical sweeping yet exactly argued *Saving Capitalism* is a revelatory indictment of our economic status quo and an empowering call to civic action

States of Entanglement Sven Anderson, Alan Butler, David Capener, Donal Lally, Clare Lyster, Fiona McDermott, 2021-07-21 Investigates how data production and consumption territorialize the physical landscape filtered through Ireland s role in global communications and as told by the Irish Pavilion at the 2021 Venice Architecture Biennale features an installation that focuses on the materiality of data infrastructure in space As our everyday lives become increasingly entangled with data technologies the book addresses the utopian fantasy that surrounds the Cloud as transcending physical presence or resourcing By bringing the physical infrastructure around data and its impact on the environment under the spotlight it hopes to reframe how we understand data production and highlight the myth that information technologies are hidden and without major material manifestations on the landscape The context for the book is Ireland which has a significant historical role in the evolution of global communications and data infrastructure In 1866 the world s first transatlantic telegraph cable landed on the West coast of Ireland In 1901 the inventor of the radio Guglielmo Marconi transmitted some of the world s first wireless radio messages from Ireland across the Atlantic Ocean to Newfoundland Today Dublin has overtaken London as the data centre hub of Europe hosting 25% of all available European

server space And by the year 2027 data centres are forecast to consume a third of Ireland's total electricity demand The book aims to raise awareness around the hardware of the global internet and Cloud services which is interwoven with the Irish landscape made manifest through the vast constellation of data centres fibre optic cable networks and energy grids that have come to populate its cities and suburbs over recent decades The publication accompanies and supports Entanglement the Irish Pavilion at the 17th Venice Architecture Biennale by archiving the production of the pavilion filtered through a series of poetic excerpts that describe the form components content and furniture that make up the installation At the same time the book is conceived as more than just a catalog by positioning some of the cultural and spatial implications of data technologies in Ireland within a more universal context through contributions by ANNEX the team selected to produce the pavilion as well as invited contributors from the disciplines of Media Theory Journalism Computer Science Geography History and Architecture
