Infrastructures of Reality: Metaverse Stories, Spaces, Bodies Chris Hesselbein, Paolo Bory, 2025-08-09 This open access book focuses on two dimensions of the development of the metaverse that are crucial to reality namely spatiality and embodiment Metaversal technologies are thought to fundamentally affect both our spaces and bodies which are two central aspects of the constitution of social reality Both spatiality and embodiment are core elements of world making that are being pulled into the ambit of metaversal projects On the one hand metaversal technologies are profoundly spatial in the sense that they render space in virtual form or overlay digital layers onto pre-existing physical spaces On the other hand metaversal technologies are directly geared towards the body in that they not only seek to extend or expand our embodied senses and emplace our bodies in virtual spaces but they also seek to capture their behaviours and actions on a far more granular level This can create new opportunities in terms of work social interaction and leisure but can also open our bodies up to new tech-driven interventions and control Whether in the form of VR or AR such technologies not only reproduce space but also rely on making spaces more legible and open to automated interventions Taken together the metaversification of spaces and bodies gives rise to crucial questions about the goals and implications of metaversal developments by large technology companies and about the relationship between the developments of the metaverse and AI systems Drawing on our combined background and expertise in Science and Technology Studies and the History of Media and Communication we critically analyse the development of metaversal technologies and platforms by discussing a broad set of developments and examples from a wide range of technology and gaming companies Written in clear concise and accessible language and combining and applying novel theoretical frameworks and concepts to a currently emergent phenomenon this book will find a large audience not only within academic and professional circles but also in popular culture

Research and Innovation Forum 2022 Anna Visvizi, Orlando Troisi, Mara Grimaldi, 2023-03-14 This book features research presented and discussed during the Research Innovation Forum Rii Forum 2022 As such this book offers a unique insight into emerging topics issues and developments pertinent to the fields of technology innovation and education and their social impact Papers included in this book apply inter and multi-disciplinary approaches to query such issues as technology enhanced teaching and learning smart cities information systems cognitive computing and social networking What brings these threads of the discussion together is the question of how advances in computer science which are otherwise largely incomprehensible to researchers from other fields can be effectively translated and capitalized on so as to make them beneficial for society as a whole In this context Rii Forum
