Creating Reading Instruction for All Children Thomas G. Gunning, 1996 This book will not tell you how to teach reading Teaching reading is in large measure a matter of making choices Should you use basal readers or children s books or both Should you teach children to read whole words or to sound out words letter by letter or both Should you have three reading groups or four or no groups There are no right answers to these questions The answers depend on your personal philosophy your interpretation of the research the level at which you are teaching the kinds of students you are teaching community preferences and the nature of your school or school district s reading program

Universal Teaching Strategies H. Jerome Freiberg, Amy Driscoll, 2000 This book presents teaching from three specific actions Organizing Instructing and Assessing and is divided into three sections which reflect each of these teaching actions The strategies presented in each section are truly universal in nature they cut across grade levels subject areas and teaching situations The book emphasizes Context Content and Learner as essential elements in the decision making process This book bridges the gap between theory research and practice with clear and effective writing and a framework that combines the context content and learner with what teachers need in the real world organizing instructing and assessing Universal Teaching Strategies expands both the pedagogical teaching knowledge of teachers and their instructional repertoires For the continuing education of pre service and in service teachers

Reading Problems Joyce Holt Jennings, JoAnne Schudt Caldwell, Janet W. Lerner, 2006 Would the world be a better place if human societies were somehow able to curb their desires for material goods Saleem Ali s pioneering book links human wants and needs by providing a natural history of consumption and materialism with scientific detail and humanistic nuance It argues that simply disavowing consumption of materials is not likely to help in planning for a resource scarce future given global inequality

development imperatives and our goals for a democratic global society Rather than suppress the creativity and desire to discover that is often embedded in the exploration and production of material goods which he calls the treasure impulse Ali proposes a new environmental paradigm one that accepts our need to consume treasure for cultural and developmental reasons but warns of our concomitant need to conserve In evaluating the impact of treasure consumption on resource rich countries he argues that there is a way to consume responsibly and alleviate global poverty
