Readings in the History of Education Arthur Orlo Norton,2015-07-08 Excerpt from *Readings in the History of Education* Mediaeval Universities These readings in the history of mediaeval universities are the first installment of a series which I have planned with the view of illustrating mainly from the sources the history of modern education in Europe and America They are intended for use after the manner of the source books or collections of documents which have so vastly improved the teaching of general history in recent years No argument is needed as to the importance of such a collection for effective teaching of the history of education but I would urge that the subject requires in a peculiar degree rich and full illustration from the sources The life of school college or university is varied vivid even dramatic while we live it but once it has passed it becomes thinner and more spectral than almost any other historical fact Its original records are in all conscience thin enough the situation is still worse when they are worked over at third or fourth hand flattened out smoothed down and desiccated in the pages of a modern history of education Such histories are of course necessary to effective teaching of the subject but the records alone can clothe the dry bones of fact with flesh and blood About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
