Power And Politics In Globalization:

Power and Politics in Globalization Howard H. Lentner, 2004-09-15 Challenging the conventional view that globalization embodies a new and inexorable process this book analyzes the political foundations and choices involved in contemporary arrangements in the world Rather than treating politics as contention for control over an unforeseeable future the book explains the background by which the world has arrived at its present state Thus the author presents a view that emphasizes continuity with the past while still acknowledging what is new in the present Invoking many examples throughout the author bolsters the theoretical analysis in an extended case study of Malaysia **International**

Institutions and Power Politics Anders Wivel, T.V. Paul, 2019-10-01 This book moves scholarly debates beyond the old question of whether or not international institutions matter in order to examine how they matter even in a world of power politics Power politics and international institutions are often studied as two separate domains but this is in need of rethinking because today most states strategically use institutions to further their interests Anders Wivel T V Paul and the international group of contributing authors update our understanding of how institutions are viewed among the major theoretical paradigms in international relations and they seek to bridge the divides Empirical chapters examine specific institutions in practice including the United Nations International Atomic Energy Agency and the European Union The book also points the way to future research International Institutions and Power Politics provides insights for both international relations theory and practical matters of foreign affairs and it will be essential reading for all international relations scholars and advanced students *Power in the 21st Century* Enrico Fels, Jan-Frederik Kremer, Katharina Kronenberg, 2012-04-10

Governance, Globalization and Public Policy Patricia Kennett,2008 Governance Globalization and Public Policy is concerned with exploring the nature of the policy arena in the context of globalization and the reconstitution of the state The contributors to this book seek to broaden extend and integrate theoretical conceptual and substantive policy debates The book begins by exploring the concepts and perspectives associated with globalization and governance the relationship

between them and the repercussions for public policy and the state. It also considers developments at the global and regional levels and the implications of the emergence of new regulatory regimes in the context of liberalization and privatization. The focus then turns to a broad range of substantive areas of public policy such as human rights, health and health care, housing, markets, poverty, security and counter terrorism. Together the chapters provide a thorough integrated insight into the relationship between global processes, governance and public policy across a range of policy domains. Providing a comprehensive analysis of patterns and processes of governance in specific areas of public policy, this book will be of great interest to students undertaking programmes in social policy, social administration, public policy and political science as well as researchers and academics concerned with the policymaking process.

Chinese Perspectives on Globalization and Autonomy Tuo Cai, 2012-01-06 This book is a reflection of the discussion and debates on globalization and state autonomy in China. These debates dated back to early 1990s witnessed China's gradual involvement in globalization. Like other developing countries, China faced tremendous pressure when globalization intensified in the 1990s. As it turned out, China arduously made up its mind to embrace globalization which reached its height when China was finally adopted as a member of the World Trade Organization in 2001. Thus the articles in this book record the anxiety, concerns, uncertainty and enthusiasm of Chinese scholars in the face of China's embracing of globalization. In other words, this book presents a unique Chinese perspective on globalization and state autonomy.

Market Power Politics Stephen E. Gent, Mark J.C. Crescenzi, 2021-01-12 A new theory of market power politics that explains when and why states will delay cooperation or even fight wars in pursuit of this elusive goal. How are the Iraqi invasion of Kuwait, the Russian incursions into Ukraine and Georgia and China's occupation of islands in the South China Sea related? All three of these important moments in modern history were driven by the motivation to capture market power. Whether it was oil for Iraq, natural gas for Russia or rare earth elements for China, the goal isn't just the commodities themselves; it is the ability to determine their price on the global market. In *Market Power Politics*, Stephen Gent and Mark Crescenzi develop a new theory of market power politics that explains when and why states will delay cooperation or even fight wars in pursuit of this elusive goal. Empirically examining case studies from different regions of the world, they explore how competition between states over market power can create disruptions in the global political economy and potentially lead to territorial aggression and war. They also provide clear policy recommendations urging international institutions to establish norms that reduce the potential for open conflict. Ultimately, *Market Power Politics* shows that nations' desire to increase their market power means that the push for territorial expansion will continue to shape the trajectory of world politics.

Political Asymmetries in the Era of Globalization Josef Schröfl, 2007 At the latest since 9 11 the phenomenon of the asymmetry or more common the asymmetric warfare has become a subject within International Relations So highly unequal parties face each other in asymmetric warfare with one of them trying to inflict major damage on the other by making only a minor effort Since the time when interstate wars started to disappear the traditional ideas of wars have become useless and obsolete as a basis for political decision making For several years policy makers officials and writers on defence and foreign policy have employed the terms asymmetric or asymmetry to characterize everything from the nature of the threats we face to the nature of war and beyond Labelling current and future threats as asymmetric diminishes our understanding of the threat environment In the age of globalization of new threats new and even revolutionary technologies and new forms of military operations the requirement for clear thinking increases commensurately Authors from four continents will follow this new way of thinking

Property, Power and Politics Jean-Philippe Robé, 2020-10-05 Globalization is an extraordinary phenomenon affecting virtually everything in our lives And it is imperative that we understand the operation of economic power in a globalized world if we are to address the most challenging issues our world is facing today from climate change to world hunger and poverty This revolutionary work rethinks globalization as a power system feeding from and in competition with the state system Cutting across disciplines of law politics and economics it explores how multinational enterprises morphed into world political organisations with global reach and power but without the corresponding responsibilities In illuminating how the concentration of property rights within corporations has led to the rejection of democracy as an ineffective system of government and to the rise in inequality Rob offers a clear pathway to a fairer and more sustainable power system

Global Politics Anthony G. McGrew, Paul Lewis, 2013-05-02 This innovative new text is derived from a highly successful Open University course of the same title It takes as a dominant theme the contested issue of globalization the apparent intensification of global patterns of inter dependence and its implications for the autonomy of the modern nation state Following a conceptual introduction which critically examines the theoretical debates framing the study of world politics the work is structured around four key processes of globalization which the authors identify as being the central determinants of contemporary global politics These key processes are the global impact

of great power relations the globalizing tendencies of technological innovation the existence of a global economy and the globalizing force of modernity Reflecting this structure the text is organized into four discrete sections Each section explores both theoretically and empirically one of the four processes of globalization Throughout particular attention is paid both to a critical evaluation of these globalizing processes as well as to their consequences for the sovereignty and autonomy of the modern nation state Moreover the authors combine a lucid treatment of theoretical debates with topical case study material to produce a text which is extremely accessible to undergraduate students studying international relations and politics and to those readers with little prior knowledge of world affairs
