Sustainable Leadership David Ducheyne, 2017-05-19 How to lead efficiently in a volatile uncertain complex and ambiguous world Leadership has never been as difficult as it is today And it has never been as crucial In this VUCA world people ask leaders to provide certainty They cannot In the volatile uncertain complex and ambiguous world certainty comes from character Leaders can base their leadership on empathy fairness kindness and reciprocity These basic human elements are under pressure This book provides both emerging and established leaders with the ingredients they need to develop a sustainable leadership style EXCERPT A newly appointed CEO wrote that she wants to find a balance between her own values and what is expected from her I hope for her that both are not too far apart The board of the company chose her to do the job because of who she is not because of who she is not And here is the main challenge for those who are in a leadership role How can you be a leader and still remain yourself Something in leadership or in its context seems to urge people to change and become someone else But leaders are not actors If I can give only one advice do not change who you are You can be come more of yourself and grow as a person But the moment you try and change who you are you lose the only thing that is sustainable and dear to you your character This book is about sustainable leadership based on character ABOUT THE AUTHOR David Ducheyne wrote this book as a source of inspiration for leaders who are looking for ways to maintain their leadership in VUCA times It s also a documented intention to try and do better

McDonnell, Matthew Allen, Colin Filer, 2017-03-22 The relationship between customary land tenure and modern forms of landed property has been a major political issue in the Spearhead states of Melanesia since the late colonial period and is even more pressing today as the region is subject to its own version of what is described in the international literature as a new land rush or land grab in developing countries This volume aims to test the application of one particular theoretical framework to the Melanesian version of this phenomenon which is the framework put forward by Derek Hall Philip Hirsch and Tania Murray Li in their 2011 book Powers of Exclusion Land Dilemmas in Southeast Asia Since that framework emerged from studies of the agrarian transition in Southeast Asia the key question addressed in this volume is whether land transformations in Melanesia are proceeding in a similar direction or whether they take a somewhat different form because of the particular nature of Melanesian political economies or social institutions The contributors to this volume all deal with this question from the point of view of their own direct engagement with different aspects of the land policy process in particular countries Aside from discussion of the agrarian transition in Melanesia particular attention is also paid to the growing problem of land access in urban areas and the gendered nature of landed property relations in this region
