Privatization And Regulation Of Transport Infrastructure Guidelines For Policymakers And Regulators:

Privatization and Regulation of Transport Infrastructure Antonio Estache, Ginés de Rus, 2000-01-01 The 1990s saw an increase in the liberalisation of transport policies and a strengthening of the role of private operators and investors in transport infrastructure worldwide The search for sustained improvement in efficiency is probably secondary to the need to find additional financing but it is improvement in services that is at the core of the new role of the government in transport Governments must now become fair economic regulators of many of the privately operated transport services and infrastructures This book examines the major challenges that governments are likely to face in taking on their new role in transport

Regulatory Framework in India Sapna Chadah, 2017-01-01 Since 1980s deregulation and contracting out of governmental functions services and responsibilities have reverberated around the world under the impact and influence of liberalization privatization and globalization LPG The shift of power from the public to the private sector has profound implications for public law There has been a shift in the perceived role of Government from acting as the principal vehicle for socio economic development to guiding and facilitating that development What we see is not that total retreat of the State but rather the substitution of one form of involvement by the state in the economy for another The book deals with legal and policy issues underpinning the development and strengthening of the regulatory and institutional framework for better governance Main thrust of book is to study and analyze the changes introduced under the impact of liberalization privatization and globalization on the system and sub systems of governance from the perspective of economy efficiency effectiveness ethics and equity The book is useful to legal professionals administrators academicians researchers and students

Public Private Partnerships in Transport Athena Roumboutsos, 2015-07-28 Over the last thirty years Public Private Partnerships PPPs have been used to deliver transport capital projects and services PPPs are complex arrangements that require a multi disciplinary approach in order to assure their success though research on the subject has been fragmented This book fills the gap in existing literature by providing insight into these complex arrangements at their various stages of development Public Private Partnerships in Transport trends and theory is structured to follow the life cycle of a PPP project and strikes a balance between theory and practice Divided into four parts each section highlights major concerns and offers an array of views and policy recommendations Parts include context for national implementation decision models performance measures and efficiency standards This book includes an expanded discussion on the findings presented discussed and analysed at the closing event of the COST Action TU1001 network on the topic of PPPs in transport The result will be of significant interest to the academic community policy makers and practitioners

A Handbook of International Trade in Services Aaditya Mattoo, Robert M. Stern, Gianni Zanini, 2007-11-22 International trade and investment in services are an increasingly important part of global commerce Advances in information and telecommunication technologies have expanded the scope of services that can be traded cross border Many countries now allow foreign investment in newly

privatized and competitive markets for key infrastructure services such as energy telecommunications and transport More and more people are travelling abroad to consume tourism education and medical services and to supply services ranging from construction to software development In fact services are the fastest growing components of the global economy and trade and foreign direct investment FDI in services have grown faster than in goods over the past decade and a half International transactions however continue to be impeded by policy barriers especially to foreign investment and the movement of service providing individuals Developing countries in particular are likely to benefit significantly from further domestic liberalization and the elimination of barriers to their exports In many instances income gains from a reduction in protection to services may be far greater than from trade liberalization in goods In light of the increasing importance of international trade in services and the inclusion of services issues on the agendas of the multilateral regional and bilateral trade negotiations there is an obvious need to understand the economic implications of services trade and liberalization A Handbook of International Trade in Services provides a comprehensive introduction to the subject making it an essential reference for trade officials policy advisors analysts academics and students Beginning with an overview on the key issues in trade in services and discussion of the GATS the book then looks at trade negotiations in the service sector the barriers to trade in services and concludes by looking at a number of specific service sectors such as financial services e commerce health services and the temporary movement of workers

Megaprojects and Risk Bent Flyvbjerg,Nils Bruzelius,Werner Rothengatter,2003-02-13 Megaprojects and Risk provides the first detailed examination of the phenomenon of megaprojects It is a fascinating account of how the promoters of multi billion dollar megaprojects systematically and self servingly misinform parliaments the public and the media in order to get projects approved and built It shows in unusual depth how the formula for approval is an unhealthy cocktail of underestimated costs overestimated revenues undervalued environmental impacts and overvalued economic development effects This results in projects that are extremely risky but where the risk is concealed from MPs taxpayers and investors The authors not only explore the problems but also suggest practical solutions drawing on theory experience and hard scientific evidence from the several hundred projects in twenty nations and five continents that illustrate the book Accessibly written it will be the standard reference for students scholars planners economists auditors politicians and interested citizens for many years to come

Stakeholders, Governance and Responsibility Shahla Seifi,David Crowther,2018-09-14 This book re examines the relationships between stakeholders governance and corporate social responsibility It address different aspects of these relationships from a wide international and interdisciplinary perspective

An Opportunity for a Different Peru Marcelo Giugale,Vicente Fretes Cibils,2007 For the first time in the republican history of Peru the presidential transition takes place in democracy social peace fast economic growth and favorable world markets In other words there has never been a better chance to build a different Peru a richer country more equal and governable There are multiple ways to achieve that goal New reforms must stem from a widespread

and participatory debate one of a common vision conceived for and by Peruvians This book aims at making a technical and independent contribution to such debate it summarizes the knowledge available about the challenges to be faced by the new administration The study does not recommend silver bullets but suggests policy options It is based on the analysis of the current reality and in six decades of relationships with Peru in which the Bank has implemented more than 100 projects and prepared more than 500 technical reports covering the wide range of development topics When necessary the study provides lessons that the Bank has learned elsewhere The study provides a conceptual framework to the analysis of the country's 34 economic sectors and the two historical perspectives behind them In doing so it offers a comprehensive reform agenda that sheds light on possible priorities and courses of action

Granting and Renegotiating Infrastructure Concessions J. Luis Guasch, 2004 Annotation Little over a decade ago infrastructure concessions promised to solve Latin America's endemic infrastructure deficit Awarded in competitive auctions these concessions were supposed to combine private sector efficiency with rent dissipation brought about by competition Yet something did not go quite right as concessions were plagued with opportunistic renegotiations most of them at the expense of taxpayers **Granting and Renegotiating Infrastructure Concessions** is a major contribution toward understanding what went wrong and what should be done differently in the future to reap the potential benefits of infrastructure reform and private participation in infrastructure provision It begins by analyzing a rich data set on more than 1 000 infrastructure concessions uncovering a series of puzzling stylized facts It then considers alternative explanations for the patterns it has uncovered and concludes with a series of insightful policy proposals aimed at avoiding common mistakes enabling concessions to efficiently contribute to economic growth and poverty reduction

Proceedings of the Conference on "Revisiting Egypt's Competitiveness" Center for Economic and Financial Research and Studies (Egypt), 2005 **World Bank Policy Research Bulletin** World Bank, 1999 Transportation Quarterly, 2001 **Port Privatisation** James Reveley, Malcolm T. Tull, 2008 The transformation of public ports into commercially orientated and profitable entities is occurring apace in the Asia Pacific region This timely book is the first to take a regional perspective on port reform and port privatisation A range of countries is examined including China Japan Korea Malaysia Singapore Australia and New Zealand The book's contributors are academic specialists in the fields of port economics and management whose country studies illustrate a variety of port privatisation methods and outcomes in an economically politically and culturally diverse region connected by extensive maritime trade networks Significantly the book concludes that privatisation of ports is an important but far from universal approach to reforming the region's ports Focusing exclusively on port privatisation in the Asia Pacific region this book will be of great interest to academics and policymakers who are interested in port reform together with those interested in privatisation more generally in the Asia Pacific region

Where Do We Stand on Transport Infrastructure Deregulation and Public-private Partnership? Antonio Estache, Tomás Serebrisky, 2004 **Journal of Economic Literature**, 2001 **Private Participation in Airport Activity**

in Egypt Sahar Tohamy,2001 **Proceedings of the ... Annual Conference** Canadian Transportation Research Forum. Conference,2002 *Reforming Transport* Christopher Willoughby,2007 The Stationery Office Agency Catalogue Stationery Office (Great Britain),2000 *World Cities* Giok Ling Ooi,2010 The book focuses on the major challenges that world cities are facing in such key areas such as governance social inclusiveness infrastructural development financial solvency as well as environmental and ecological sustainability Based on case studies from cities in North America Europe and the Asia Pacific top academics professionals and policymakers from the world over presents their views on how to best strike the balance between growth and sustainability **Report of the One Hundred and Twenty Ninth Round Table on Transport Economics Held in Paris on 13th -14th May 2004 on the Following Topic : Transport Services, the Limits of (de)regulation** Transport Research Centre,Organisation for Economic Co-operation and Development,2006 While deregulation and privatization in the transport sector have led to increases in productivity in general not all reform hopes have materialized In particular the reform of the provision of infrastructure services has not caused the expected mobilization of private resources and concession relations have been less stable and less efficiency enhancing than expected In view of current discussions of reform results the Round Table focused on the following issues Where are the limits for deregulation The discussion identified the conditions under which competition and potential competition can be expected to work More care has to be applied to single out the transport sub sectors where these conditions hold Which are the crucial factors that necessitate regulation Many parts of the transport sector are fraught with indivisibilities network economies sector specific assets or lack of resale markets for investment goods Where these factors play an important role regulation might improve the efficiency of the transport system What is the role of the transaction costs of regulation The neglect of surrogate market transaction costs in particular in the case of vertical disintegration has led to lower than expected benefits from the reforms What is the cost of regulation Regulatory policies have to take account of the information asymmetries between the actors involved Monitoring and control costs have often prohibited the depoliticizing of regulatory processes The Round Tale discussed to what extent a rule bound performance based regulation could contain the friction resulting from discretionary regulatory powers
