## **Problem Of Perception:**

The Problem of Perception A. D. Smith, 2005-01-01 In a major Contribution to the theory of perception A D Smith presents a truly original defense of direct realism the view that in perception we are directly aware of things in a physical world It offers two arguments against direct realism one concerning illusion and one concerning hallucination that up to now no theory of perception could adequately rebut At the heart of Smith's theory is a new way of drawing the distinction between perception and sensation alone with an unusual treatment of the nature of object of hallucination *The Problems of Perception* R. J. Hirst, 2014-03-18 First published in 2002 Written in 1959 this volume looks at the philosophical problems of perception that arise mainly because our traditional common sense notions clash with the factual evidence concerning not only the occurrence of illusions and hallucinations but also the essential role played by complex causal and psychological processes in perceiving **The Problems of Perception** R. J. Hirst, R J, 2002 First Published in 2002 Routledge is an imprint of Taylor Francis an informal company **The Problem of Perception and the Experience of God** Sameer Yadav, 2015 Based on the author's thesis Th D Duke Divinity School 2014 titled The problem of perception and the perception of God John McDowell and the theology of religious experience *Elements and Problems of Perception* Désirée Park, 1983

**The Principles of Psychophysiology: The problems of psychology and perception** Leonard Thompson Troland, 1929 **Perception** Barry Maund, 2014-12-18 The philosophical issues raised by perception make it one of the central topics in the philosophical tradition Debate about the nature of perceptual knowledge and the objects of perception comprises a thread that runs through the history of philosophy In some historical periods the major issues have been predominantly epistemological and related to scepticism but an adequate understanding of perception is important more widely especially for metaphysics and the philosophy of mind For this reason Barry Maund provides an account of the major issues in the philosophy of perception that highlights the importance of a good theory of perception in a range of philosophical fields while also seeking to be sensitive to the historical dimension of the subject The work presents chapters on forms of natural realism theories of perceptual experience representationalism the argument from illusion phenomenological senses types of perceptual content the representationalist intentionalist thesis and adverbialist accounts of perceptual experience The ideas of among others Austin Dretske Heidegger Millikan Putnam and Robinson are considered and the reader is given a philosophical framework within which to consider the issues **The Realm of Perception** Zohra Saiyidain, 1970 The Eye and the Mind C. Landesman, 1993-10-31 This book is a discussion of some of the major philosophical problems centering around the topic of sense perception and the foundations of human knowledge It begins with a characterization of our common sense understanding of the role of the senses in the acquisition of belief and it argues that scientific accounts of the processes of perception undermine salient parts of this understanding The naive point of view of direct realism cannot be sustained in the light of a scientifically instructed understanding of perception This critique of

direct realism points to the correctness of the representative theory of perception characteristic of such early modern philosophers as Descartes and Locke and it also endorses the subjective turn that they defended. It argues that these positions do not require introducing sense data into the picture and thus it avoids the intractable problems that the sense datum philosophy introduces. In addition, several versions of cognitive accounts of sense perception are criticized with the result that it is unnecessary to characterize sensory processes in intentional terms. The book then turns to a leading question introduced into modern philosophy by Descartes and Locke: the question of the accuracy of the information delivered by the senses to our faculty of belief. In particular, how accurate are our representations of the secondary qualities? The case of color is considered in detail.

**Problems of Perception**, 1966      *Problems of Vision* Gerald Vision, 1997. In this breakthrough study, Gerald Vision proposes a new causal theory, one that engages provocatively with a species of direct realism and makes no use of the now discredited subjectivism.
