guide and reference text for engineer personnel responsible for planning scheduling and controlling construction projects in the theater of operations TO It provides planning and management techniques to be applied when planning and scheduling a construction project This manual also provides techniques and procedures for estimating material equipment personnel and time requirements for project completion Management definitions are as varied as the authors who write books about the subject A good definition states that management is the process of getting things done through people Project management may be defined more specifically as the process of coordinating the skill and labor of personnel using machines and materials to form the materials into a desired structure Project construction operations include planning designing facilities procuring materials and equipment and supervising construction An important Army management principle states that continual improvement in systems methods and use of resources is required for continuous effectiveness in operations In most large nontactical Army organizations management engineering staffs help commanders and line operators design new ways to work faster cheaper and better

Contemporary Issues in Construction in Developing Countries George Ofori, 2012-06-26 Economic growth and socio economic development are particularly important for developing countries and the construction industry plays a central role in driving both of these Traditionally the issues faced have been assumed to be merely offshoots of those encountered in industrialised nations and are usually discussed only in this context In addition research in construction management and economics has generally failed to take proper account of the unique or highly emphasised characteristics of the industries in developing countries or their economic and social environment This volume challenges underlying assumptions and focuses on the distinct characteristics of construction in developing countries In so doing it considers the issues from the perspective of the developing countries themselves to present a strong contemporary picture for researchers It forms a companion volume to *New Perspectives on Construction in Developing Countries* which provides an update on the generic subjects relating to the construction industry in developing countries and covers new concepts and issues
