## **Seventeenth-century Rigging** Roger Charles Anderson, 1969 **Dutch Navies of the 80 Years' War 1568-1648**

Bouko de Groot, 2018-10-18 The tiny new state of the United Provinces of the Netherlands won its independence from the mighty Spanish empire by fighting and winning the Eighty Years War from 1568 and 1648 In this long conflict warfare on

water played a much bigger role in determining the ultimate victor On the high seas the fleet carved out a new empire growing national income to such levels that it could continue the costly war for independence Yet it was in coastal and inland waters that the most decisive battles were fought Arguably the most decisive Spanish siege Leiden 1574 was broken by a fleet sailing to the rescue across flooded polders and the battle of Nieuwpoort in 1600 the largest successful invasion fleet before World War II was one of the most decisive battle in western history Using detailed full colour artwork this book shows how the Dutch navies fought worldwide in their war of independence from Brazil to Indonesia and from the Low Countries to Angola

 Engelbert Elias,1933      Vanguard of Empire Roger Craig Smith,1993 In this book Smith has assembled a portrait of the  
 small vessels invented and refined in the shipyards of Spain and Portugal half a millennium ago He focuses on the advances  
 in maritime technology that made the European conquest of the New World possible Shipwrights worked by trial and error to  
 make ships that would travel faster and farther carrying larger and larger cargoes Pilots developed new methods of celestial  
 navigation and learned the patterns of wind and sea currents Long voyages taxed the physical and emotional well being of  
 the crew requiring new methods of supply and sustenance In addition to covering these developments Smith s book shows  
 how ships were built outfitted and manned illustrating what life at sea was like in the late fifteenth and sixteenth centuries  
 Focusing on the advances in maritime technology that made European expansion possible this book will shed light on a
