Harry Eiss, 2014-06-02 In his book about the discovery of the structure of DNA James Watson wrote So we had lunch telling ourselves that a structure this beautiful just had to exist Indeed the quest most often asked by scientists about a scientific theory is Is it beautiful Yes beauty equals truth Scientists know mathematicians know But the beauties the truths of mathematics and science were not the truths that inspired the author as a child and he intuitively knew that the truths he needed come from a different way of knowing a way of knowing not of the world of logic and reason and explanation though they have a value but rather a way of knowing that is of the world expression a world that enters the truths beyond the grasp of logic That is what this book is all about It is an exploration of the greatest minds of human existence struggling to understand the deepest truths of the human condition This second edition updates the previous one incorporating new publications on Van Gogh recent discoveries in neurology psychology and the rapid developments in understanding DNA and biotechnology We've come a long way already from that original discovery by Watson and his coauthor Francis Crick

**Reversing the Senses** Martin Hubbard, 2014-02-11 You've achieved a measure of external success But is it sustainable Do you have internal peace Have you reached a respectable level of business and financial success but feel a nagging sense that you're still not good enough to sustain it Do you appear self-assured to the world but secretly feel plagued by self-doubt Have you hit ceilings that you can't break through Welcome to the club This book is for people like you high achievers who want to feel better about what they've already accomplished while being empowered to accomplish even more You're an ambitious results-driven no-excuses bottom liner You've climbed over or pushed your way through monumental barriers to get where you are You accept nothing but the best in yourself and in others You've earned your success So why do you still feel insecure In striving to get to the next level you studied the lives of other high achievers you read all the cutting edge business books in search of the next breakthrough strategy But the answers and the reassurance you seek lie much closer to home they lie within yourself This book teaches you how to access your inner resources consistently and powerfully As you do so you will learn how to expand your inner capacity to think and see clearly maintain positive and optimistic thoughts make wise decisions and feel calm peaceful and confident regardless of what is happening in your external world Edgar Allan Poe, Eureka, and Scientific Imagination David N. Stamos, 2017-02-28 Silver Winner 2017 Foreword INDIES Book of the Year Awards in the Philosophy category In 1848 almost a year and a half before Edgar Allan Poe died at the age of forty his book Eureka was published In it he weaved together his scientific speculations about the universe with his own literary theory theology and philosophy of science Although Poe himself considered it to be his magnum opus Eureka has mostly been overlooked or underappreciated sometimes even to the point of being thought an elaborate hoax Remarkably however in

Eureka Poe anticipated at least nine major theories and developments in twentieth century science including the Big Bang theory multiverse theory and the solution to Olbers paradox In this book the first devoted specifically to Poe s science side David N Stamos a philosopher of science combines scientific background with analysis of Poe s life and work to highlight the creative and scientific achievements of this text He examines Poe s literary theory theology and intellectual development and then compares Poe s understanding of science with that of scientists and philosophers from his own time to the present Next Stamos pieces together and clarifies Poe s theory of scientific imagination which he then attempts to update and defend by providing numerous case studies of eureka moments in modern science and by seeking insights from comparative biography and psychology cognitive science neuroscience and evolution

J. J. M. Vingerhoets,Frans van Bussel,Jan Boelhouwer,1997 The Non Expression of Emotions in Health Disease contains the texts of contributions to the international conference on the non expression of emotions in health and disease held at Tilburg University on August 28 30 1996 Emotions are important for people in daily life Their relevance is linked to their communicational aspects and their function to motivate fuel and guide our efforts to cope with the world around us But emotions can also seriously interfere with people s ability to function adequately and can thus impede adaptation In addition both quasi experimental and correlational studies have yielded support for the hypothesis that the nonexpression of emotions may be an important factor for health status However it is not entirely clear how the different constructs and findings obtained with different methodologies relate to one another Also little is known about possible aetiological factors associated with nonexpression Why are some individuals more expressive than others What are the basic functions of emotional expressiveness and why and how could nonexpressiveness be associated with poor health status Topics like alexi thymia emotions and disease and the clinical aspects are addressed in this publication Finally there are contributions focusing on adult crying The book is intended for both researchers and clinicians in the behavioral sciences and in medicine **A Celebration of Neurons** Robert Sylwester,1995 Provides an introduction to late twentieth century scientific understanding of the development organization and operation of the brain written especially for educational leaders and suggests some broad educational applications that may be introduced in schools

**Walking the Möbius Strip** Johanna Heil, 2016 Walking the Mobius Strip locates Richard Powers's fiction at the crossroads of postmodern and post postmodern aesthetics and argues that this paradigm shift shapes the models of knowledge and understanding that underwrite his work The readings of *Plowing the Dark* *Galatea 2.2* and *The Echo Maker* are inspired by Jacques Lacan's image of cognition as a Mobius strip on which different forms of propositional and non propositional knowledge bleed into and depend upon one another Drawing on feminist epistemology and psychoanalysis this study highlights Powers's interest in the non propositional aspects of cognition that is in all that escapes the frameworks of scientific empiricism and can only be known through the mediation of fictional narrative It reveals a deep dissatisfaction in the novels with the suggestion that knowledge and understanding must be objective and rational and elucidates Powers's idea that fiction can be a powerful tool for integrating various kinds of knowledge *Mind Myths* Sergio Della Sala, 1999-06-02 Mind Myths shows that science can be entertaining and creative Addressing various topics this book counterbalances information derived from the media with a scientific view It contains contributions from experts around the world Aslib Book Guide, 1993 **The Psychoanalytic Century** David E. Scharff, 2001 The Psychoanalytic Century examines and celebrates Freud's extraordinary influence on modern analysis and Western culture as a whole The book comprehensively covers the evolution of our understanding of hysteria as the diagnostic entity through which Freud invented psychoanalysis and the assessment of the contribution of Freud and his successors to the theory of love and clinical approaches to love relations as well as to literature the visual arts international diplomacy and race In this volume we celebrate Freud's legacy and explore the scope of his impact on psychoanalysis society and culture The contributions of many distinguished colleagues follow the evolution of analysis as his ideas move beyond historical artifact to become living internal objects embedded in Western culture David Scharff from his introduction Gender and Belief Systems Natasha Warner, 1996 Journal of Behavior Therapy and Experimental Psychiatry, 1992 **Elementary Social Studies** Joseph M.
