Nineteenth-Century Travels, Explorations and Empires, Part I Vol 1 Peter J Kitson, William Baker, Indira Ghose, Susan Schoenbauer Thurin, 2021-11-18 A collection of writings on travels undertaken in the Victorian era The texts collected in these volumes show how 19th century travel literature served the interests of empire by promoting British political and economic values that translated into manufacturing goods

Realm of Ice and Sky Buddy Levy, 2025-01-28 Two time National Outdoor Book Award winning author Buddy Levy's thrilling narrative of polar exploration via airship and the men who sacrificed everything to make history Arctic explorer and American visionary Walter Wellman pioneered both polar and trans Atlantic airship aviation making history's first attempts at each Yet Wellman has been cast as a self promoting egomaniac known mostly for his catastrophic failures Instead he was a courageous innovator who pushed the boundaries of polar exploration and paved the way for the ultimate conquest of the North Pole which would be achieved not by dogsled or airplane but by airship In 1908-09 American explorers Dr Frederick Cook and Robert Peary in separate expeditions both claimed they'd reached the North Pole first but their claims were seriously questioned There was enough doubt that Norwegian explorer extraordinaire Roald Amundsen who'd made history and a name for himself by being the first to sail through the Northwest Passage and the first man to the South Pole attempted to fly to the North Pole by airship He would go in the Norge designed by Italian aeronautical engineer Umberto Nobile The 350 foot Norge flew over the North Pole on May 12 1926 and Amundsen was able to accurately record and verify their exact location However Nobile felt slighted by Amundsen Two years later Nobile returned this time in the Italia backed by Prime Minister Benito Mussolini This was an Italian enterprise and Nobile intended to win back the global accolades and reputation he believed Amundsen had stripped from him The journey ended in disaster death and accusations of cannibalism launching one of the greatest rescue operations the world had ever seen *Realm of Ice and Sky* is the riveting tale of the men who first flew the most technologically advanced airships of their time to the top of the world risking and even giving their lives for science country and polar immortality

O'Callaghan, 2011 This resource uniquely offers preservice and inservice teachers templates for using quality children's

literature to implement six themes across grades K-8. The themes are based on national curriculum standards and text sets are carefully selected to facilitate discussion, analysis, and problem solving across the grades. *Using Children's Literature Across the Curriculum* provides teachers with a guide to using multilayered texts to facilitate students' attainment of critical literacy. It is designed to be a supplemental text to guide teachers in designing literacy instruction. The instructional sequence includes collaborative inquiry activities across the curriculum to extend each theme to math, science, technology, and social studies. Teachers are shown how to incorporate family literacy with a component entitled *Home School Connections* and to differentiate instruction for individual learners with a section entitled *On Your Own Activities*. The theme concludes with a critical literacy activity that applies the content knowledge of the theme with collaborative inquiry. A unique feature of the handbook is the emphasis on performance-based assessment with each instructional sequence containing two rubrics for the teacher to implement. The instructional sequences are meant as models for teachers to use in developing their own themes in order to facilitate critical literacy. These models can be adjusted to fit the reading level of the students as teachers become more familiar with the text's structure and their students' needs.
