Social Theories of Risk and Uncertainty Jens O. Zinn, 2009-01-22 Written by leading experts in the field Social Theories of Risk and Uncertainty is an introduction to mainstream theorizing on risk and uncertainty in sociology Provides an overview of the historical developments and conceptual aspects of risk Identifies why theorizing on risk is necessary and highlights specific sociological contributions to this field of research Explores key topics including risk society and reflexive modernization culture and risk governmentality and risk systems theory and risk and edgework and voluntary risk taking Offers a comprehensive look at the promises pitfalls and perspectives of risk theorizing Risk, Environment, and Society Piet Strydom, 2002 How and why have the closed expert debates of past decades become an open public discourse about nuclear environmental and biotechnological risks What can a cultural and institutional analysis reveal about risks and their social construction Is it possible to develop a new critical theory of the risk society This book offers an overview and analysis of nuclear global environmental and biotechnological dangers threats and hazards in the context of public debates about risk from the 1950s to the present It considers what impact these risks and debates are having on society transforming underlying cultural assumptions for example about nature but also public communication social institutions and even the way society is organized Piet Strydom reconstructs public debates and social scientific theories to provide a fresh approach to the risk society From this comes a new theoretical perspective for studying the emerging social conditions of the twenty first century The result is a penetrating and essential text for students and researchers across a range of areas including sociology environmental studies politics and cultural and communications studies World at Risk Ulrich Beck, 2013-10-29 Twenty years ago Ulrich Beck published Risk Society a book that called our attention to the dangers of environmental catastrophes and changed the way we think about contemporary societies During the last two decades the dangers highlighted by Beck have taken on new forms and assumed ever greater significance Terrorism has shifted to a global arena financial crises have produced worldwide consequences that are difficult to control and politicians have been forced to accept that climate change is not idle speculation In short we have come to see that today we live in a world at risk A new feature of our world risk society is that risk is produced for political gain This political use of risk means that fear creeps into modern life A need for security encroaches on our liberty and our view of equality However Beck is anything but an alarmist and believes that the anticipation of catastrophe can fundamentally change global politics We have the opportunity today to reconfigure power in terms of what Beck calls a cosmopolitan material politics World at Risk is a timely and far reaching analysis of the structural dynamics of the modern world the global nature of risk and the future of global politics by one of the most original and exciting social thinkers writing today **Environmental Values in a Globalizing World** Ian Lowe, Jouni Paavola, 2004-08-02 This multidisciplinary volume presents a refreshing new approach to environmental values in the global age it investigates the challenges that globalization poses to traditional environmental values in general as well as

**New Medicalism and the Mental Health Act** John Fanning, 2018-08-09 Ten years have passed since the Mental Health Act MHA 2007 came into force in England An amending statute the Act reformed the MHA 1983 and reshaped the law governing the compulsory care and treatment of people suffering from mental disorders Primarily driven by concerns about risk it sought to remove legalistic obstacles to civil commitment and extend the law's coercive reach into the community At the time of its introduction the 2007 Act was written off as a retrograde step and a missed opportunity for radical rights focused reform Despite this little attention has been paid to its impact in the years since Published to coincide with the tenth anniversary of the 2007 Act this book offers a timely evaluation of mental health law and policy in England It argues that the current MHA defies easy categorisation within any of the descriptive models which have customarily narrated the mechanics of civil commitment namely legalism new legalism and medicalism It therefore makes the case for a new model new medicalism to account for the 2007 Act's enhancement of the discretion of mental health professionals for the express purposes of facilitating the management of situations of risk In doing so the book critically examines the problems inherent in civil commitment frameworks organised around the concept of risk explores the theoretical foundations of new medicalism considers the challenges facing proponents of future reform in the era of the UN Convention on the Rights of Persons with Disabilities and reflects on the 2007 Act's practical impact

Secrecy and Science Brian Balmer, 2012 Drawing on classical sociological writing on secrecy by Simmel Merton and Shils Secrecy and Science draws on recently declassified documents to investigate significant episodes in the history of biological and chemical warfare At the same time it draws on more contemporary perspectives in science and technology studies that understand knowledge and social order as co-produced within heterogeneous networks of things and people in order to develop a theoretical set of arguments about how the relationship between secrecy and science might be understood

Secrecy and Science Professor Brian Balmer, 2013-01-28 It is no secret that twentieth century Britain was governed through a culture of secrecy and secrecy was particularly endemic in military research and defence policy surrounding biological and chemical warfare More generally it is hard to exaggerate the role of secrecy in all past biological and chemical warfare programmes and several recent historical surveys of biological and chemical warfare research have emphasised that all state sponsored programmes together with sub

state organised activities were cloaked in utmost secrecy Of these research programmes Britain carried out one of the most significant in scale and scope in the twentieth century Yet partly because of the secrecy surrounding the programme there is still little academic literature on its historical development Equally and despite secrecy being a pervasive feature of past and contemporary societies social scientists and historians have paid relatively little scholarly attention to the nature mechanics and effects of secrecy particularly with regard to secrecy in relation to the production and governance of science and technology Drawing on classical sociological writing on secrecy by Simmel Merton and Shils this groundbreaking book by Brian Balmer draws on recently declassified documents to investigate significant episodes in the history of biological and chemical warfare At the same time it draws on more contemporary perspectives in science and technology studies that understand knowledge and social order as co produced within heterogeneous networks of things and people in order to develop a theoretical set of arguments about how the relationship between secrecy and science might be understood *Risk and Trust* Law Commission of Canada,2007 Exploring a broad range of case studies including young women in conflict with the law child soldiers welfare recipients genetic testing biotechnology and new technologies the contributors explore whether the concept of risk has undermined our sense of trust in society effectively eroding the definition of citizenship marginalizing particular people and groups needlessly heightening societal fears and rendering invisible social inequalities

**Organization and Innovation** David Knights,Darren McCabe,2003 Drawing on case studies from the UK manufacturing and financial service sectors this book argues that the emergence and popularity of a range of management innovations reflects and facilitates the reproduction of a neo liberal economics that has dominated Western politics for over almost a quarter of a century **Negotiating Futures--states, Societies and the World** Žaneta Ozoliņa,2005 The Environmental Communication Yearbook Stephen P.
