Risk Management, Derivatives, and Financial Analysis Under SFAS No. 133 Gary L. Gastineau, 2001 *Risk Management, Derivatives and Financial Analysis Under SFAS* Gary Gastineau, Donald Smith, 2001-04-18 Senior Vice President, New Products Development at the American Stock Exchange. Risk management is concerned with the tradeoffs between financial risk and reward that inevitably face a firm's managers, its board of directors, and ultimately its shareholders. Although risk management itself is not new, what is new are the complicated financial instruments being used to manage risk, instruments that are frequently classified under the seemingly simple category of derivatives. Use of these instruments has largely gone unreported in financial statements, much to the dismay of financial analysts and in contrast to their ideal of transparency. This volume explains a firm's use of risk management practices and how those practices can be accounted for. Coverage includes a practical and theoretical basis for risk management information on
