Risky Rivers The Economics And Politics Of Floodplain Farming In Amazonia:

Risky Rivers Michael Chibnik, 1994-01-01 While anthropologists and ecologists have carefully described the activities of the slash and burn cultivators ranchers and miners of tropical South America they have largely overlooked the economic strategies and political struggles of riverine people who survive by flood recession agriculture and fishing These ribere_os who constitute the majority of the inhabitants of the Amazonian floodplains of Peru have developed ecologically sustainable resource management practices that enable them to cope with periodic inundations of their fields by risky rivers They have however suffered greatly from unpredictable crop prices and erratic state agricultural policies Michael Chibnik here examines the household economies cultural ecology grassroots political organizations of ribere_os living in three floodplain villages near Iquitos Peru He describes the villagers remarkable history their participation in misconceived development programs and their longstanding conflicts with regional elites Chibnik discusses the political ecology of the region in the context of arguments about appropriate development policies in tropical lowlands Although ribere_os practice intensive agriculture with low environmental impact they have not been able to improve their economic circumstances in recent years Chibnik s study is a significant and timely contribution to current debates about the possibility of sustainable equitable development in Amazonia

Amazonia in the Anthropocene Nicholas C. Kawa, 2016-05-10 Widespread human alteration of the planet has led many scholars to claim that we have entered a new epoch in geological time the Anthropocene an age dominated by humanity This ethnography is the first to directly engage the Anthropocene tackling its problems and paradoxes from the vantage point of the world s largest tropical rainforest Drawing from extensive ethnographic research Nicholas Kawa examines how pre Columbian Amerindians and contemporary rural Amazonians have

shaped their environment describing in vivid detail their use and management of the region's soils, plants and forests. At the same time he highlights the ways in which the Amazonian environment resists human manipulation and control, a vital reminder in this time of perceived human dominance. Written in engaging accessible prose, *Amazonia in the Anthropocene* offers an innovative contribution to debates about humanity's place on the planet, encouraging deeper ecocentric thinking and a more inclusive vision of ecology for the future.

Amazon Peasant Societies in a Changing Environment Cristina Adams, Rui S. S. Murrieta, Walter A. Neves, Mark Harris, 2008-12-02 Amazonia is never quite what it seems. Despite regular attention in the media and numerous academic studies, the Brazilian Amazon is rarely appreciated as a historical place home to a range of different societies. Often left invisible are the families who are making a living from the rivers and forests of the region. Broadly characterizing these people as peasants, *Amazon Peasant Societies in a Changing Environment* seeks to bring together research by anthropologists, historians, political ecologists and biologists. A new paradigm emerges which helps understand the way in which Amazonian modernity has developed. This book addresses a comprehensive range of questions from the politics of conservation and sustainable development to the organization of women's work and the diet and health of Amazonian people. Apart from offering an analysis of a neglected aspect of Amazonia, this collection represents a unique interdisciplinary exercise on the nature of one of the most beguiling regions of the world.

The Amazon Várzea Miguel Pinedo-Vasquez, Mauro L. Ruffino, Christine Padoch, Eduardo S. Brondízio, 2010-11-30 This book takes a multi disciplinary and critical look at what has changed over the last ten years in one of the world's most important and dynamic ecosystems, the Amazon floodplain or várzea. It also looks forward, assessing the trends that will determine the fate of environments and people of the várzea over the next ten years and providing crucial information that is needed to formulate strategies for confronting these looming realities.

Sociedades Caboclas Amazônicas Cristina Adams, 2006 *World Agricultural Economics and Rural Sociology Abstracts*, 1999

Some Other Amazonians Mark Harris, Stephen L. Nugent, 2004

Anthropological work in Amazonia has traditionally focused on Amerindian societies and more recently development projects, colonists and the resource base represented in the humid neotropics. Receiving far less attention is the Amazonia of caboclos, people of mixed Brazilian Indian, European and African ancestry, river traders, rum distillers, immigrant communities of Lebanese, Japanese and Jews, quilombos, settlements formed by escaped slaves, ornamental fish trappers and others whose long presence in the region defies the stereotypes of a frontier *inferno verde*. These other Amazonians present a vivid refutation of stereotypical views about the social landscape. This book brings to light the diversity of Amazonian societies and contributes to the extension of anthropological work beyond its traditional limits. Bryant, Thora Martina Herrmann, 2008 *Advances in Economic Botany*, 1984 Population, Land Management, and Environmental Change Juha I. Uitto, Akiko Ono, 1996 Agricultural development that is environmentally socially economically and culturally sustainable is essential for food production of the increasing world population and the very future of mankind The issues pertaining to the so called population environmental nexus are at the heart of the current debate on sustainable development It is argued that while on a global scale population growth is one of the main driving forces of environmental change there are significant local variations in the interrelationship between people food production and environmental change This publication is based on the UNU Global Environmental Forum which brought together leading scholars from both the South and the North to address the issues of population land management and environmental change The authors draw extensively upon field research carried out in the tropical and subtropical regions of South East Asia Sub Saharan Africa and the Amazon the agricultural ecosystems indigenous knowledge in the sustainable management of biological and land resources the role of women and participatory approaches to rural development It is realized that a large part of the problem of conservation of biological diversity lies outside of the protected areas in agricultural areas where pressures have led to often detrimental changes in the production processes and the environment It is argued that indigenous production systems are often highly adaptive to the local ecological and socio economic conditions and can be sustainable if given the chance British Bulletin of Publications on Latin America, the Caribbean, Portugal and Spain, 1994 **Agriculture and Human Values**, 2007

Life on the Amazon Mark Harris, 2000 This text explores how identity is created and defined Dr Harris uses two forms of ethnographic writing to explore the historical and social identity of a village of caboclo fisherpeople who live on the banks on the River Amazon **Development Anthropologist**, 1995 The Journal of Developing Areas, 1994 **Várzea** Christine Padoch, 1999 Fish and Fisheries Forest and Forestry Conservation Soils and River Dynamics Land Resource Management The Case of the Vanishing Stingless Bee **Do Tropical Forests Provide Natural Insurance?** Suhbrendu Pattanayak, Erin O.
