Risky Behavior Among Youths An Economic Analysis:

Risky Behavior among Youths Jonathan Gruber, 2009-02-15 Every day young people engage in risky behaviors that affect not only their immediate well being but their long term health and safety These well honed essays apply diverse economic analyses to a wide range of unsafe activities including teen drinking and driving smoking drug use unprotected sex and criminal activity Economic principles are further applied to mental health and performance issues such as teenage depression suicide nutritional disorders and high school dropout rates Together the essays yield notable findings price and regulatory incentives are critical determinants of high risk behavior suggesting that youths do apply some sort of cost benefit calculation when making decisions the macroeconomic environment in which those decisions are made matters greatly and youths who pursue high risk behaviors are significantly more likely to engage in similar behaviors as adults This important volume provides both a key data source for public policy makers and a clear affirmation of the usefulness of economic analysis to our understanding of risky behavior

Risky Behaviour Among Youths Jonathan Gruber, 2000 **Dimensions of Tax Design** Institute for Fiscal Studies (IFS), 2010-04-30 The goal of the Mirrlees Review has been to identify what makes a good tax system for an open developed economy in the 21st century and to suggest how the UK tax system could be reformed to move in that direction As an integral part of the Review this volume brings together thirteen studies of different dimensions of tax design plus associated commentaries These were commissioned from IFS researchers and other international experts to be of interest and value in their own right as well as to provide inspiration for the final report of the Review which is published as a separate volume *Tax by Design* The Commission's work was directed by Tim Besley Richard Blundell Malcolm Gammie James Poterba The Commission's editorial team Stuart Adam Stephen Bond Robert Chote Paul Johnson Gareth Myles NBER Reporter National Bureau of Economic Research, 2008 Risky Health Behaviour Among Adolescents Petter Lundborg, 2003 The American Economic Review, 2005-03 Includes annual List of doctoral dissertations in political economy in progress in American universities and colleges and the Hand book of the American Economic Association **The Journal of Economic Perspectives**, 2001 This journal attempts to fill a gap between the general interest press and other academic economics journals Its articles relate to active lines of economics research economic analysis of public policy issues state of the art economic thinking and directions for future research It also aims to provide material for classroom use and to address issues relating to the economics profession **The Effects of Mandatory Seatbelt Laws on Seatbelt Use, Motor Vehicle Fatalities, and Crash-related Injuries Among Youths** Christopher Scott Carpenter, Mark Stehr, 2007 We provide the first comprehensive assessment of the effects of mandatory seatbelt laws on self reported seatbelt use highway fatalities and crash related injuries among high school age youths using data from the Centers for Disease Control's CDC national state and local Youth Risk Behavior Surveys YRBS and the Fatality Analysis Reporting System FARS from 1991 to 2005 a period spanning over 20 changes in state seatbelt laws Our quasi

experimental approaches isolate the independent effects of seatbelt laws net of demographic characteristics area and year fixed effects and smooth area specific trends Across all data sources we find consistent evidence that state mandatory seatbelt laws particularly those permitting primary enforcement significantly increased seatbelt use among high school age youths by 45 80 percent primarily at the extensive margin Unlike previous research for adults however we find evidence against the selective recruitment hypothesis seatbelt laws had consistently larger effects on those most likely to be involved in traffic accidents drinkers alcohol involved drivers We also find that mandatory seatbelt laws significantly reduced traffic fatalities and serious injuries resulting from fatal crashes by 8 and 9 percent respectively Our results suggest that if all states had primary enforcement seatbelt laws then regular youth seatbelt use would be nearly universal and youth fatalities would fall by about 120 per year National Bureau of Economic Research web site *Using Routinely Collected Data to Monitor and Investigate Health Inequalities* Samuel B. Essays on Human Capital

Acquisition Philip Scott Babcock, 2005 These essays investigate causes of interpersonal variations in skill acquisition during youth a crucial starting point for inquiries into unemployment poverty traps wage inequality and other issues at the heart of labor economics Common to the essays is a focus on non cognitive skill acquisition by myopic agents an attempt to bring new modes of thought to bear on old problems Chapter I posits a model in which rational but myopic adolescents optimize by trading off privileges against leisure while schools set an implicit price of leisure by revoking privileges or imposing punishments for low effort choices The analysis estimates the response of student effort choices and skill acquisition outcomes to changes in the price of leisure as measured by an index of school specific discipline policies Court climate and density of public interest lawyers instrument for the price of leisure Results show that students appear to consume less leisure when costs of leisure are higher and that long run skill outcomes appear higher for students from schools with higher prices of leisure Chapter II uses micro level data on friendship networks to estimate effects of social capital on skill acquisition The analysis shows that years of schooling and college attendance are positively correlated with an individual's social capital 7 years earlier as measured by connections to and from other agents The correlation persists when grade cohort connectedness instruments for individual connectedness and school dummies are included Also grade cohort ethnic fractionalization is associated with significantly lower levels of social capital rare micro level evidence of a relationship between heterogeneity and disconnectedness Research in Chapter III indicates that effort elicitation rather than the teaching of specific skills may be the dominant channel by which small classes influence disadvantaged students The analysis uses the transition from grade 3 to grade 4 in San Diego Unified School District as a source of exogenous variation in class size given a California law funding small classes only up until grade 3 Empirical findings indicate that class size expansion may reduce gains for low effort students more than for high effort students but no significant difference in reductions of gains is observed when types are defined by ability
