**The Best Knowledge of Project Management** Ram Babu Sao, 2025-11-14 This book *The Best Knowledge of Project Management* is intended for the best way to Project Planning and Review work. Project management is all about change. Think about the scope of changes, personnel changes and budget changes that are all part of the job. The best project managers find a way to stay on top of change not just within individual projects but across the span of a career. With that in mind we put out a call asking veteran project managers for their thoughts on how project management has changed over the past several decades. Project management methodology began to take form with the advent of the Critical Path Method (CPM) and the Program Evaluation and Review Technique (PERT). The Critical Path Method (CPM) was developed by Dupont. CPM is a

technique used to predict project duration by analysing which sequence of activities has the least amount of scheduling flexibility It was designed to address the complex process of shutting down chemical plants for maintenance and maintenance The PERT is a method for analysing the tasks involved in completing a project especially the time needed to complete each task and identifying the minimum time needed to complete the total project Project management was largely based on Waterfall techniques This was good enough to land men on the moon and bring them home safely But the world has only become more complex and we've seen project management techniques adapt to those changes over time The American Association of Cost Engineers invented the Program Evaluation Review Technique PERT first for the U S Navy's Polaris Project The Gantt Chart Developed by Henry Gantt in 1917 One of the forefathers of project management Henry Gantt is best known for creating his self named scheduling diagram the Gantt chart In the 1950s project management methodology began to take form with the advent of the Critical Path Method CPM for the Polaris missile project and the U S Navy's development of the Program Evaluation and Review Technique PERT The American Association of Cost Engineers invented the Total Cost Management Framework Early practitioners of project management and the associated specialties of planning and scheduling cost estimating cost and schedule control formed the AACE in 1956 Total cost management is a process for applying the skills and knowledge of cost engineering It is also the first integrated process or method of portfolio programmed and project management The United States Department of Defense created the WBS concept as part of the Polaris mobile submarine launched ballistic missile project
