Right To Development A Primer:

The Right to Development Centre for Development and Human Rights, 2004-05-25 The Right to Development RTD a concept that emerged in the 1970s is one of the most debated and contentious issues in international relations RTD builds on the rights based approach to development seeking to integrate the norms and principles of human rights with policies and plans to promote development Despite its importance for the world s poor and dispossessed a great deal of definitional confusion still surrounds the concept This primer introduces the concept of RTD as well as discusses its practical application in the Indian setting It is divided accordingly into two sections the first of which traces the origins and the evolution of the idea of RTD This section identifies the defining parameters and content of RTD and focuses especially on the three rights the rights to food education and health that have been identified as a good starting point for the implementation of RTD The last chapter in this section underscores the importance of women s rights in order to emphasise the need to focus on safeguarding and promoting the human rights of vulnerable groups Part II covers substantially the Indian situation relating to RTD The first chapter in this section provides an overview of the legal and institutional mechanism in India for the protection of human rights in general and women s rights in particular The next chapter examines the implementation of the rights to food health and education The last chapter in this section details the functioning of Public Interest Litigation PIL which has emerged in recent years as an important mechanism for securing social justice and the challenges and limitations of this mechanism *Brownlie's Documents on Human Rights* Ian Brownlie, Guy S Goodwin-Gill, 2010-06-24 Basic Documents on Human Rights provides a collection of key documents and covers all elements of the subject It is an account of the most important instruments adopted by the UN its agencies regional organizations and other actors **Realizing the Right to Development** United Nations. Office of the High Commissioner for Human Rights, 2013 This book is devoted to the 25th anniversary of the United Nations Declaration on the Right to Development It contains a collection of analytical studies of various aspects of the right to development which include the rule of law and good governance aid trade debt technology transfer intellectual property access to medicines and climate change in the context of an enabling environment at the local regional and international levels It also explores the issues of poverty women and indigenous peoples within the theme of social justice and equity The book considers the strides that have been made over the years in measuring progress in implementing the right to development and possible ways forward to make the right to development a reality for all in an increasingly fragile interdependent and ever changing world *Handbook of Research on International Consumer Law, Second Edition* Geraint Howells, Iain Ramsay, 2018-07-27 Consumer law and policy continues to be of great concern to both national and international regulatory bodies and the second edition of the Handbook of Research on International Consumer Law provides an updated international and comparative analysis of the central legal and policy issues in both developed and developing economies **Human Rights and the Capabilities Approach** Diane Elson, Sakiko Fukuda-Parr, Polly

Vizard,2014-06-11 Among several contesting views about the purpose of development and how progress should be evaluated human rights and capabilities or human development stand out as two approaches that are concerned first and foremost with the well being of individuals their freedom dignity and empowerment These two approaches contrast sharply with the dominant development frameworks that emphasize economic growth as the essential objective Though human rights and capabilities share these common commitment to human priorities they are distinct concepts and fields that have developed separately The aim of this volume is to explore the relationship between them in order to enhance the understanding of both as theoretical paradigms as public policy frameworks and as approaches to development The book includes contributions from some of the leading scholars in the two fields of capabilities approach and human rights It covers the essential aspects of this relationship addressing the complementarities between human rights and capabilities as theoretical concepts how the concept of capabilities can contribute to resolving some key theoretical issues in human rights how the social science analysis and methods of the capabilities approach can clarify human rights concepts and strengthen human rights advocacy and how human rights norms can strengthen public policy and mobilize collective action to demand greater accountability in placing human priorities first in public policy Human Rights and the Capabilities Approach raises many questions for further inter disciplinary conversation and further research This book was originally published as a special issue of the Journal of Human Development and Capabilities and has been expanded with two additional articles from this journal and a new foreword by Professor Amartya Sen

Human Rights Albert A. Zinnos,2007 Human rights refers to the concept of human beings as having universal rights or status regardless of legal jurisdiction and likewise other localising factors such as ethnicity and nationality For many the concept of human rights is based in religious principles However because a formal concept of human rights has not been universally accepted the term has some degree of variance between its use in different local jurisdictions difference in both meaningful substance as well as in protocols for and styles of application Ultimately the most general meaning of the term is one which can only apply universally and hence the term human rights is often itself an appeal to such transcended principles without basing such on existing legal concepts The term humanism refers to the developing doctrine of such universally applicable values and it is on the basic concept that human beings have innate rights that more specific local legal concepts are often based Within particular societies human rights refers to standards of behaviour as accepted within their respective legal systems regarding 1 the well being of individuals 2 the freedom and autonomy of individuals and 3 the representation of the human interest in government These rights commonly include the right to life the right to an adequate standard of living the prohibition of genocide freedom from torture and other mistreatment freedom of expression freedom of movement the right to self determination the right to education and the right to participation in cultural and political life These norms are based on the legal and political traditions of United Nations member states and are incorporated into international human rights instruments This new book brings together the latest
