**Aeolian Sand and Sand Dunes** ,2008-11-14 It is more than half a century since the publication of R A Bagnold s classic book The physics of blown sand and desert dunes and it is a tribute to the quality of Bagnold s work that many of the fundamental principles which he developed main valid today His book continues to be essential reading for any serious s dent of aeolian processes However the past two decades have seen an explosion in the scale of research dealing with aeolian transport processes sediments and landforms Some of this work has been summarized in review papers and edited conference proceedings but this book provides the rst attempt to review the whole eld of aeolian sand research Inevitably it has not been possible to cover all pects in equal depth and the balance of included material naturally re ects the thors own interests to a signi cant degree However our aim has been to provide as broad a perspective as possible and to provide an entry point to an extensive mul disciplinary scienti c literature some of which has not been given the attention it deserves in earlier textbooks and review papers Many examples are drawn from existing published work but the book also makes extensive use of our own research in the Middle East Australia Europe and North America The book has been written principally for use by advanced undergraduates po graduates and more senior research workers in geomorphology and sedimentology

*Depositional Sedimentary Environments* H.-E. Reineck,I. B. Singh,2012-12-06 This book has been written with the aim of compiling from modern environments information that can be useful in the reconstruction of ancient environments It is intended for all those interested in recognizing depositional environments The study of sediments includes investigations of various aspects of sediments This needs a study by standard methods Methods of study have not been included as many textbooks exist on the subject However the importance of various results obtained from such investigations has been discussed as far as these results can be helpful in environ mental reconstruction Special attention is given to information that has accumulated during the last decades on the mode of genesis of various sedimentary features and their distribution in present day environments As far as possible existing terminology has been used How ever in several cases new simple groupings and classifications have been proposed In making classification generally the form and shape of the features have been considered so that they can be applied easily to ancient sediments At the same time the genesis of such features has been noted and genetic names and their characteristics have been given for detailed work The subject is so vast that several primary sedimentary features that have no direct bearing on environmental interpretation have been omitted The subject is vast and numerous publications are available
