Gill,Wybo P. Heere,2021-10-18 This collection of essays in honour of Professor Leo Bouchez covers a wide variety of topics within the field of international law and related disciplines which Professor Bouchez came into contact with over the course of his long and distinguished career as a practising attorney The contributions by a distinguished group of friends and professional colleagues reflect the diversity of his intellectual interests and professional activities of both a theoretical and a practical nature The essays include such topics as jurisdiction extradition law human rights and self determination the use of force and the enforcement of United Nations sanctions territory and the law of the sea as well as essays on municipal law topics relating to international law and on international relations Professor Bouchez was a senior partner in the firm of Houthoff and Associates and Adjunct Professor of International Law at the University of Utrecht until his retirement in 1998 **Ideology and Foreign Policy in Early Modern Europe (1650-1750)** Gijs Rommelse,2016-05-13 The years 1650 to 1750 sandwiched between an age of wars of religion and an age of revolutionary wars have often been characterized as a de ideologized period However the essays in this collection contend that this is a mistaken assumption For whilst international relations during this time may lack the obvious polarization between Catholic and Protestant visible in the proceeding hundred years or the highly charged contest between monarchies and republics of the late eighteenth century it is forcibly argued that ideology had a fundamental part to play in this crucial transformative stage of European history Many early modernists have paid little attention to international relations theory often taking a Realist approach that emphasizes the anarchism materialism and power political nature of international relations In contrast this volume provides alternative perspectives viewing international relations as socially constructed and influenced by ideas ideology and identities Building on such theoretical developments allows international relations after 1648 to be fundamentally reconsidered by putting political and economic ideology firmly back into the picture By engaging with and building upon recent theoretical developments this collection treads new terrain Not only does it integrate cultural history with high politics and foreign policy it also engages directly with themes discussed by political scientists and international relations theorists As such it offers a fresh and genuinely

interdisciplinary approach to this complex and fundamental period in Europe's development      **Aufriss der historischen Wissenschaften in sieben Bänden: Sektoren** Michael Maurer, 2001      Warfare in Europe 1815-1914 Peter H. Wilson, 2017-11-22 The history of nineteenth century European warfare is framed by the end of the Napoleonic Wars in 1815 and the outbreak of the First World War in 1914 The Crimean War and the struggles for Italian and German unification divide this century in two In the first half armies struggled to emerge from the shadow of Napoleon amidst an era of financial retrenchment political unrest and accelerating technological change The mid century wars left an equally problematic legacy including aspects that pointed towards total war The 26 essays in this volume examine these changes from a variety of innovative and fresh perspectives      **The Fiscal-military State in Eighteenth-century Europe** Christopher Storrs, 2009 In recent decades historians of early modern Europe and above all those who study the eighteenth century elaborated the concept of what has been called the fiscal military state This volume of essays by leading authorities all of whom have published widely on their chosen topic explores the subject of the fiscal military state by focusing on its leading exemplars in eighteenth century Europe In addition a further chapter considers the fiscal military state in a broader comparative international context in the arena of international relations The differing patterns and the variety of models of fiscal military state makes for ease of comparison across Europe The volume will therefore be invaluable to both students and researchers alike      International Relations Theory of War Ofer Israeli, 2019-04-10 Covering 1816-2016 this book deals extensively with the international system as well as the territorial outcomes of several key wars that were waged during that time period providing an instructive lesson in diplomatic history and international relations among global powers Based on an in depth review of the leading theories in the field of international relations International Relations Theory of War explains an innovative theory on the international system developed by the author that he applies comprehensively to a large number of case studies The book argues that there is a unipolar system that represents a kind of innovation relative to other systemic theories It further posits that unipolar systems will be less stable than bipolar systems and more stable than multipolar systems providing new insights relative to other theories that argue that unipolar systems are the most stable ones The first chapter is devoted to explaining the manner of action of the two dependent variables systemic international outcome and intra systemic international outcome The second chapter presents the international relations theory of war and its key assumptions The third chapter precisely defines the distribution of power in the system The fourth chapter examines the theory's two key phenomena The fifth and last chapter presents the book's conclusions by examining the theoretical assumptions of the international relations theory of war      **Das Historisch-politische Buch** Günther Franz, 1953

**Waves of Time** K.R. Dark, 2001-01-31 This volume provides an overview of the whole range of long term analyses in international relations It evaluates and draws on theoretical approaches in both the humanities and social sciences in subjects such as sociology history anthropology and archaeology and recent progress in evolutionary theory and the

mathematical study of complexity The resulting analysis reinterprets processes of global political change in the past and present and opens fresh areas of enquiry for international relations      Francia Deutschen Historischen Institut Paris,1985
