Technology and the Rise of Great Powers Jeffrey Ding, 2024-08-20 A novel theory of how technological revolutions affect the rise and fall of great powers When scholars and policymakers consider how technological advances affect the rise and fall of great powers they draw on theories that center the moment of innovation the eureka moment that sparks astonishing technological feats In this book Jeffrey Ding offers a different explanation of how technological revolutions affect competition among great powers Rather than focusing on which state first introduced major innovations he investigates why some states were more successful than others at adapting and embracing new technologies at scale Drawing on historical case studies of past industrial revolutions as well as statistical analysis Ding develops a theory that emphasizes institutional adaptations oriented around diffusing technological advances throughout the entire economy Examining Britain's rise to preeminence in the First Industrial Revolution America and Germany's overtaking of Britain in the Second Industrial Revolution and Japan's challenge to America's technological dominance in the Third Industrial Revolution also known as the information revolution Ding illuminates the pathway by which these technological revolutions influenced the global distribution of power and explores the generalizability of his theory beyond the given set of great powers His findings bear directly on current concerns about how emerging technologies such as AI could influence the US China power balance

**Ancient Chinese Thought, Modern Chinese Power** Yan Xuetong, 2013-08-25 From China's most influential foreign policy thinker a vision for a Beijing Consensus for international relations The rise of China could be the most important political development of the twenty first century What will China look like in the future What should it look like And what will China's rise mean for the rest of world This book written by China's most influential foreign policy thinker sets out a vision for the coming decades from China's point of view In the West Yan Xuetong is often regarded as a hawkish policy advisor and enemy of liberal internationalists But a very different picture emerges from this book as Yan examines the lessons of ancient Chinese political thought for the future of China and the development of a Beijing consensus in international relations Yan it becomes clear is neither a communist who believes that economic might is the key to national power nor a neoconservative who believes that China should rely on military might to get its way Rather Yan argues political leadership is the key to national power and morality is an essential part of political leadership Economic and military might are important components of national power but they are secondary to political

leaders who act in accordance with moral norms and the same holds true in determining the hierarchy of the global order  
 Providing new insights into the thinking of one of China's leading foreign policy figures this book will be essential reading for  
 anyone interested in China's rise or in international relations      **Global Politics** James Lee Ray, 1992 Ancillary package  
 available upon adoption      *Shadow on the White House* David L. Anderson, 1993 Harry Truman's administration began  
 searching for an American response to the clash in Indochina between French colonialism and Vietminh communism in 1945  
 Thirty years and five administrations later Gerald Ford and his aides tried unsuccessfully to solicit additional aid for South  
 Vietnam from a reluctant Congress For Truman Ford and every American leader in between the dilemma in Vietnam hung  
 ominously over the presidency In *Shadow on the White House* seven prominent historians examine how the leadership of six  
 presidents and an issue that grew into a difficult and often unpopular war shaped each other Focusing on the personalities  
 politics priorities and actions of the presidents as they confronted Vietnam the authors consider the expansion of presidential  
 power in foreign policy formulation since World War II In their analyses they chronicle the history of executive leadership as  
 it related to Vietnam assess presidential prerogatives and motives on war and peace issues and clarify the interconnection  
 between the modern presidency and the nation's frustrating tragic and humiliating failure in Southeast Asia Although other  
 histories have been written about the Vietnam experience this book is the first systematic and comparative survey on  
 presidential leadership as it relates to the war issue It is organized by presidential administrations giving a detailed  
 examination of each president's decisions and policies Based on the most recently opened archival sources the essays provide  
 a framework on which to hang the kaleidoscopic events of the war Amazon.com      *International Politics and Institutions in  
 Time* Orfeo Fioretos, 2017-04-05 *International Politics and Institutions in Time* is the definitive exploration by a group of  
 leading international relations scholars of the contribution of the historical institutionalism tradition for the study of  
 international politics Historical institutionalism is a counterpoint to the rational choice and sociological traditions of analysis  
 in the study of international institutions bringing particular attention to how timing and sequence of past events path  
 dependence and other processes impact distributions of global power policy choices and the outcome of international  
 political battles This book places particular emphasis on the sources of stability and change in major international institutions  
 such as those shaping state sovereignty and global governance including in the areas of international organization law  
 political economy human rights environment and security Featuring work by pioneering scholars the volume is the most  
 comprehensive collection to date on historical institutionalism in IR It is projected to be of interest to multiple audiences
