Rising Sun:

Money, Markets, and Trade in Early Southeast Asia Robert S. Wicks, 1992 Money places an explicit value on all things and this work by Robert S Wicks explores the impact of monetization in premodern Southeast Asia from the third century BC to the rise of Maleka in the early fifteenth century Ideas about money developed unevenly throughout the region and the author in seven case studies written in a highly narrative style explores why this was so He considers trade policies price controls exchange ratios monopolies variant standards of value and the administrative complexity necessary for such economic complexity Reproduced data maps tables and figures display the intertwining of anthropology archeology history culture and economics Amazon com
