Aderhold, Intention Jens Aderhold, Olaf Kranz, 2007-04-12 Der Band versammelt Texte die sich aus unterschiedlichen Perspektiven und anhand verschiedener Gegenstände mit den Fragen beschäftigen wie Menschen ihr Verhalten an sozialen Systemen orientieren können und welche Bedeutung diesen Orientierungsleistungen für soziale Prozesse beizumessen ist Renommierte Autoren aus den Bereichen der Soziologie und der Erziehungswissenschaft sowie aus Organisationstheorie Management und Politik reflektieren das sowohl sozialtheoretisch wie auch pragmatisch hochanspruchsvolle und hochbedeutsame Problem wie die Vermittlung zwischen einer auf Vereinfachungen beruhenden alltäglichen Orientierung und einer komplexen und komplizierten Systemik sozialer Prozesse

immer wieder aufs Neue gelingt oder eben misslingt **The Tolerability of Risk** Frederic Boudier, David Slavin, 2013-09-05 There is an increasing dissatisfaction about how risk is regulated leading to vivid debates about the use of risk assessment and precaution As a result academics government officials and industry leaders are calling for new approaches and fresh ideas This book provides a historical and topical perspective on the alternative concept of Tolerability of Risk and its concrete regulatory applications In the UK Tolerability of Risk has been developed into a sophisticated framework particularly within the health and safety sectors It is expected to guide decision makers when applying their legal obligation of keeping risks as low as practically reasonable Could Tolerability of Risk become a wider source of inspiration across the full scope of risk analysis and management Written by leading academics and risk practitioners from industry and government The Tolerability of Risk presents a summary of theoretical perspectives on risk approaches providing a detailed elicitation of the methods and approaches used to build the Tolerability of Risk framework and examining the prospect of universal application of that framework From nuclear power to environmental pollution climate change and drug testing the Tolerability of Risk framework may offer a workable pragmatic solution for balancing risks against the costs involved in controlling them as well as developing the institutional capacity to make effective decisions in all jurisdictions worldwide **The Illusion of Certainty** Erik Rifkin, Edward Bouwer, 2007-09-23 Risk analysis and risk assessment have been with us long enough for the terms to sound familiar to most people Standard fare for the nuclear power industry and the military for a half a century or more risk assessment is now a routine aspect of environmental management public health and individual medical decision making There have been popular books on risk and the current poker craze will likely spread risk concepts to an even wider and younger audience Yet despite all of this extensive and varied experience we the analysts and practitioners have not done nearly enough to explain to the people who need to know what they need to know especially the uncertainty inherent in risk estimates There are many instances in which the failure to communicate risk information accurately or completely has had an important and material impact on decisions and actions I have been involved in some of these ranging from local plans for water management to national decisions about nuclear waste I have seen first hand the effects of poorly done risk assessments and bad risk communication and especially the way in which the uncertainty of risk estimates is handled or mishandled The consequences of doing this wrong are high It's high time that we addressed this gap in understanding and this book is an excellent and important step in doing so **The SAGE Handbook of Nature** Terry Marsden, 2018-03-23 An ambitious retrospective and prospective overview of the field that aims to position Nature the environment and natural processes at the heart of interdisciplinary social sciences *Risks in Modern Society* Hans-Jürgen Bischoff, 2008-09-30 The International Section on Machine and System Safety was founded in 1975 to deal with questions on occupational risks in this field at the international level It is a member of the Special Commission on Prevention of the International Social Security Association ISSA The Special Commission is a body within ISSA that focuses on work related risks It has 11 international Sections as

members ISSA was founded in 1927 with its headquarters in Geneva It is working worldwide in over 150 countries with nearly 370 member institutions from all elds of social security TheSection on Machine and System Safety when it was founded had its focus on machine safety particularly on the ma facturing of safe machinery on assisting developing countries to be able to buy safe used machinery and on delivering clear operating instructions Our members and partners are institutions for safety and health at work insurance companies dealing with work related risks research institutions and various enterprises e g manufacturers importers and users of machines and systems installations We thus bring together the experiences of our members and partners The role of the operators soon grew in importance and their capability for ha ling machinery became an important factor for the safety and success of enterprises The growing importance and complexity of handling different man machine environment situations created new challenges and led to larging the Section s tasks to machine and system safety

**Gaia: ecological perspectives for science and society**, 2008 Public and Private in Natural Resource Governance Thomas Sikor, 2013 This volume develops the rich conceptual and empirical content of public private relationships increasingly acknowledged as the dominant realm of natural resource governance Ten wonderful studies from around the world illuminate opportunities for advancing the theory analysis and effective formation of sustainable systems of resource use The book is excellent for courses in governance and public policy in any resource and environmental field JEFF ROMM PROFESSOR FOR RESOURCE POLICY UNIVERSITY OF CALIFORNIA AT BERKELEY US The book addresses the theoretically and politically most important division of social organization into public and private The authors bring an exciting multidisciplinary perspective to bear on changing and multiple publics and the strength of relationships connecting these two spheres in rural development and natural resource governance The contributions range from consumer health and food safety soil science forestry and water management to sociological and economic aspects of natural resource property and governance FRANZ VON BENDA BECKMANN MAX PLANCK INSTITUTE FOR SOCIAL ANTHROPOLOGY GERMANY Natural resources have historically been considered as being governed in public or private spheres that is by the state on behalf of the people or by companies or individuals driven by the market This dichotomy between private and public is now recognized as overly simplistic and it is clear that publics and privates operate at a range of levels and with differing degrees of separation or overlap Bringing together a group of internationally respected researchers this book provides a new perspective on prominent issues in resource governance including the state NGOs civil society communities participation devolution privatization and hybrid institutions highlighting the three dimensional nature of relations between public and private It builds on empirical analyses from six fields of natural resource governance agri environment biodiversity bioenergy food quality and safety forestry and rural water and employs a comparative approach that goes beyond the specifi cities of individual policy fields recognizing shared elements and allowing for a greater understanding of the dynamics underlying governance processes Introductions to the volume and to each section summarize
