**Decision-Making in Committees** Nicola Friederike

Maaser,2010-01-22 Political and economic institutions are typically governed by committees that face the challenge to reconcile the preferences of their members How should decision rules be designed to generate fair and sustainable agreements for example if committee members represent groups of different sizes This book uses game theoretic concepts and models to address the issue of political decision making processes In addition to providing a survey on basic game theoretic tools in the analysis of political decisions the author looks at specific issues such as two tiered voting systems or the influence of lobbyists on legislative committees and shows how the models can be applied to real world contexts such as the EU decision making institutions

**The Promise and Perils of Transnationalization** Benjamin Stachursky,2013-04-02 To date most constructivist international relations studies have characterized the influence of transnationalism on domestic forms of activism as uniformly positive In particular transnational interactions are viewed as positive factors for the development and daily impact of gender activism Benjamin Stachursky s book questions the unvarying positive view of transnationalism on domestic forms of activism arguing for a more nuanced analysis that permits an understanding of the enabling and restricting effects of transnationalism Stachursky also challenges the dominant view of civil society as normatively homogenous by illustrating the complex relationships and conflicts that exist between NGOs and other civil society representatives He grounds his theoretical arguments with a comparative case study on women s rights activism in Egypt and Iran which uses semi structured interviews with women s rights activists in the two countries and analysis of documentation by local political and societal actors Looking at the period from the mid 1980s up to present developments such as the Arab Spring Stachursky analyzes the emergence and development of NGO activism in Egypt and Iran the social political and legal context of NGO activism and key domestic debates on the impact and legitimacy of the actors operating in women s rights activism By closely examining the ambivalent relationship between transnationalism and human rights organizations Stachursky proves that transnationalization has both enabling and constraining effects on the domestic legitimacy of women s rights activists and on their ability to create meaningful social and political change

The Politics of Europeanization Kevin Featherstone,Claudio M. Radaelli,2003-06-05 The Politics of Europeanization looks at the political aspects of European integration from the point of view of domestic politics In doing so it goes beyond the classic analysis of how policies are made in Brussels and raises instead the question what is the power of Europe in national contexts The questions at the heart of this volume are crucial both for our understanding of European integration and for their policy implications What does Europeanization really mean How can it be measured How is the European Union affecting domestic politics and policies in member states and candidate countries Is Europeanization an irreversible process Does it mean convergence across Europe How and why do differences remain The contributors explain and question the power of Europe by providing theoretical and empirical perspectives on domestic politics and institutions government and administration public policies political actors and business groups The volume contains a new research agenda for the nascent literature on

Europeanization      *The Political Economy of State-Business Relations in Europe* Rainer Eising, 2009-06-02 The book analyses how business interest organizations responded to the challenge of European integration and delivers important insights into major characteristics of EU governance and policy making      *1974 Annual Supplement* Joan Schmitz Bergholt, 1975-01-04      Comparative Politics Gregory S. Mahler, 2003 An exceptionally clear jargon free writing style and an emphasis on political institutions and behavior rather than on abstract conceptual frameworks make this volume consistently more accessible to readers than most others on comparative politics It features both across national approach permitting readers to develop a truly comparative understanding of the types of institutions e.g. constitutions executives legislatures political parties etc as well as a country by country approach that examines those institutions within the context of eight different countries enabling readers to see how all the pieces fit together The volume analyzes comparative political analysis constitutions and ideologies political development and political economics legislatures and legislative structures the executive judiciary and the legal order interest groups political parties and the individual and the political environments of The British French German Japanese Canadian Mexican Nigerian and Russian political systems For those interested in a comprehensive look at comparative politics      **The Civil Service** Keith Dowding, 2005-06-29 Sophisticated yet easily accessible text which applies models of bureaucracy to current changes in the British Civil Service and also looks at the impact of the EC      **Energy Abstracts for Policy Analysis**, 1982      **Select Works** Edmund Burke, 1878      Game Theory and Political Science Peter C. Ordeshook, 1978      **Neopluralism** Andrew S. McFarland, 2004 Many of the basic issues of political science have been addressed by pluralist theory which focuses on the competing interests of a democratic polity their organization and their influence on policy Andrew McFarland shows that this approach still provides a promising foundation for understanding the American political process      United States Political Science Documents, 1990      Public Opinion, 1896
