Revolutions And Reconstructions In The Philosophy Of Science:

Revolutions and Reconstructions in the Philosophy of Science Mary B. Hesse, 1980 **Revolutions and Reconstructions in the Philosophy of Science** Mary B. Hesse, 1980 **Mary B. Hesse (1924-2016): Metaphors, Models, and the Growth of Scientific Knowledge** Pietro Gori, 2025-08-20 This volume explores the work of Mary B Hesse 1924 2016 a pivotal figure in twentieth century philosophy of science At a time when the foundations of an integrated approach to the history and philosophy of science were being established Hesse as a female philosopher offered a distinctive and influential contribution grounded in a post empiricist understanding of the natural sciences Central to her thought was a focus on the metaphorical and analogical value of scientific language in contrast to views assessing its literal significance Hesse also departed from traditional hypothetico deductive accounts of scientific methodology and theory structure advancing instead perspectives rooted in both historical and contemporary scientific practices To mark the centenary of her birth this book brings together an international group of scholars to re examine and engage with Hesse s intellectual legacy The chapters address the central themes of her work and situate them within her broader philosophical context Each contribution adopts a cross disciplinary perspective highlighting the continued relevance of Hesse s ideas to current debates in the philosophy of science This volume will be of particular interest to scholars in the history and philosophy of science as well as those engaged in gender studies and the study of women in philosophy **The Sociological Revolution** Richard Kilminster, 2006-11-22 By controversially turning away from the current debates which surround social theory this book provides an historical analysis of the profound burden of sociology and its implications today L'art et les révolutions: Révolution et évolution de l'histoire de l'art de Warburg à nos jours , 1992 *Shadows of the Enlightenment* George E. McCarthy, 2025-08-05 *Shadows of the Enlightenment* sheds light on the deeply political agenda underlying Western science from the so called Age of Reason to the present George McCarthy uncovers the economic social and historical origins of modern science and illuminates the a priori and innate features which furnish the justifications for the technical domination and control of nature and humanity The natural sciences were born of a market economy commercial trade and industrial production and were furthermore reflective of the values and institutions of modern capitalism and its class system in the seventeenth century As such one of the central roles of Western science has been to legitimate its theoretical imperative to dominate nature and to reorganize human labor for profit property and power Breaking with the medieval scholastic tradition modern science viewed nature as a reified mechanism which could be mathematically measured empirically predicted causally explained and managed Nature itself was recast as a dead machine stripped of any inherent meaning or purpose Ultimately when applied to the production process the field of natural science led to scientific management and economic exploitation and when applied in the academy particularly to the social sciences the field of natural science led to the eclipse of reason and the twilight of social theory Building upon the radical analysis of Marx and Engels *Shadows of the*

Enlightenment articulates a new liberatory postmodern science and technology grounded in Marx's theory of social justice integrating ancient and modern traditions from classical Greece to the French Revolution from the Paris Commune to the Iroquois Confederacy In the process McCarthy invites us to move beyond the falsely mechanistic sense of reality and to break free from the sense of alienation that binds us all in order to make space for dreaming up a substantively democratic society

Die Herrschaft der Regel Bettina Heintz, 1993 *The Historiography of the Chemical Revolution* John G McEvoy, 2015-10-06 This study offers a critical survey of past and present interpretations of the Chemical Revolution designed to lend clarity and direction to the current ferment of views

Habermas' Begriff des historischen Materialismus Frederik van Gelder, 1990 Der Siegeszug der Naturwissenschaften hat dazu beigetragen die Menschheit in die Lage zu versetzen sich selbst für alle Zeiten auszulöschen Dennoch verdrängt der Positivismus dieses Wissen und weist jede Kritik von sich ab als vorwissenschaftlich und spekulativ Eine immanente Kritik an jenem Szientismus aber auch an den anderen Formen des abstrakten identifizierenden Denkens der sich bis in die Soziologie hinein ausgebreitet hat und der beflissentlich diese Zusammenhänge ausblendet das scheint den Kern dessen auszumachen was bei Habermas Historischer Materialismus heißt

The End of Science? Richard Quentin Elvee, 1992 The title The End of Science asks not whether science itself is about to end or even to wane but whether people will stop claiming that science knows nature as it is Science it suggests may know nature only as the scientist sees it Or the title suggests that in knowing nature scientists to some extent create nature No one bothers to ask philosophers or theologians poets or politicians workers or bosses whether they know the world as it is It is common knowledge that the world for which they speak has been affected already by their description of that world Will not the same fate strike scientists now Has it not already This is the basic issue that the six distinguished contributors address They include Sandra Harding Sheldon Lee Glashow Ian Hacking Mary Hesse Gerald Holton and Gunther S Stent Co published with the Nobel Conference
