**The Common Core in Action** Deborah J. Jesseman, 2015-06-19 This book addresses Common Core State Standard curriculum resources to assist the school librarian in collaborating with classroom teachers. Librarians are being asked to understand the Common Core State Standards (CCSS) and their implications to programming and instruction as well as to collection development planning. Using lesson plans originally published in *School Library Monthly*, this title builds upon them, adding many additional plans that address CCSS issues. The plans will help you implement the standards and can also be used as stepping stones to facilitate planning conversations and collaboration with teachers to co-teach lessons correlated with the standards. The book begins with an overview of the CCSS: what they are, how they are different from the content standards, and what the implications are for schools where the state has adopted them, including what the CCSS mean for collection development. It then goes on to explore the opportunities the CCSS present for the school librarian, looking at how you can become a leader in employing the process. The majority of the book is devoted to reproducible lesson plans organized by curricular area or topic and grade level for ease of use.

**Reading Globally, K-8** Barbara A. Lehman, Evelyn B. Freeman, Patricia L. Scharer, 2010-09-20 In *Reading Globally, K-8*, the authors make the case for why it is necessary to be globally literate and multiculturally aware in today's shrinking world, and they provide the tools teachers need to incorporate appropriate reading selections into primary and secondary school classrooms. By using books from or about other countries, teachers empower students to view the world in a more positive manner, enriching and broadening their students' lives and ultimately preparing them for life in a global economy and culture. This reader-friendly resource guides teachers and reading programme coordinators in selecting quality books for their classrooms, incorporating global literature into different content areas, and facilitating the discussions that follow. Practical guidance is provided on how to integrate the reading of global texts across the curriculum with specific application to language arts, social studies, science, maths, and the arts. Locate and evaluate the authenticity and literary merit of potential books, avoiding those that depict stereotypes. Get started with an annotated list of children's books, samples of student work, and classroom vignettes from teachers.
