Managing Sport Events T. Christopher Greenwell, Leigh Ann Danzey-Bussell, David J. Shonk, 2024-06-26 Running a sport event whether it is an international competition or local youth tournament requires acute knowledge and the ability to plan, organize, promote, lead, and communicate effectively. And no other text prepares students for the task as effectively as Managing Sport Events Third Edition With HKPropel Access. While other texts in this space stray into the area of facility management, Managing Sport Events keeps its focus where it should be by providing a thorough grounding of the entire event management process. Beginning with an overview of event conception and development, the text then moves into the principal planning areas of budgeting, marketing, promotion, sponsorships, and legal and risk management. Later chapters focus on key operational areas such as staffing, event services, and logistics, and event day management, and it closes with postevent details and evaluation. The third edition includes new and updated content that incorporates plenty of contemporary real-life examples. Insights into how event management has been affected by COVID-19 and by the emergence of social media, sustainability efforts, and diversity, equity, and inclusion (DEI) initiatives. All new content addressing the role of brand ambassadors, social media influencers, and nontraditional media in promoting events and encouraging fan engagement. An updated discussion of event sponsorships and how sport organizations are implementing creative activation strategies pre-event and game day deliverables, and the latest technologies to maximize exposure and measure effectiveness. An expanded discussion of contracts and other legal considerations such as compliance with the Americans with Disabilities Act (ADA). An expanded section outlining how principles of project management can be used to effectively plan events. New industry profiles that provide insights into key players and noteworthy happenings in event management. Related online activities delivered through HKPropel provide robust learning opportunities for students. A brand new semester-long project in which students plan, prepare, produce, and evaluate a fictional pickleball tournament, as well as compile a formal event management plan handbook. Scenario-based activities in which students make a decision and then see the implications of their choice. Mini case studies for each chapter with questions to test comprehension. Sample contracts that represent common agreements encountered in event management. Practicing and aspiring professionals working in parks and recreation, tourism, hospitality, and sport organizations at all levels (youth, high school, college, amateur, minor league, professional, and international) will find this book a valuable reference in their roles as event managers. Blending traditional business tenets of sport management with the distinct aspects of event management, Managing Sport Events Third Edition prepares readers to manage events with efficiency and ease so that fans and participants alike have lasting game day memories. Note: A code for accessing HKPropel is not included with this ebook but may be purchased separately.

Fred Eisenhammer,Eric B. Sondheimer,2014-01-10 Presented here are 60 games featuring some of the most outstanding efforts in history dramatic comebacks such as USC s 1974 triumph over Notre Dame stunning upsets Columbia s 21 20 win over Army in 1947 or Appalachian State s over Michigan 34 32 in 2007 see front cover great individual efforts Jim Brown s 43 points in a single game bizarre plays Roy Riegel s wrong way run that helped Georgia Tech defeat California and Yale Harvard 29 29 in 1968 the latter scoring 16 points in the final 42 seconds Each story includes the highlights of the games with quotes from many of the principals a look at the contest s effects on football overall career follow ups for the key participants and seasonal wrap ups for the teams involved      **Could ChatGPT Win the UK University Challenge and US College Bowl Competitions? Yes- Most Probably by KO.** Rupert Macey-Dare,2023 This paper tests and whether ChatGPT could win the UK University Challenge and US College Bowl competitions Rerunning simulations of the latest 2022 University Challenge Final but now also including ChatGPT we find that ChatGPT would be much more than just competitive and in fact most likely to win any individual contest or competition Final decisively by KO The paper then considers what these results imply for human general knowledge look up recollection retention and selection type exams and academic and professional education more generally For the last 60 or so years perhaps the ultimate test of British student and university intellectual prowess in the minds of the general public has been the annual knockout University Challenge competition shown initially from 1962 to 1987 on ITV and from 1994 to present on the BBC Quick calculations suggest that somewhere of the order of 50 000 intellectual college students may have participated in shows such as University Challenge and College Bowl which in turn must have been watched by 10s or 100s of millions of global viewers University Challenge and related competitions have thus commanded long term great public interest as a yardstick of student

intellectual prowess under pressure But now many new pretenders have arrived on the scene and are rattling the gates of the ivory towers of academia namely AI systems such as ChatGPT nurtured at intellectual development corporations such as OpenAI Inc ChatGPT launched in autumn 2022 has already acquitted itself well sometimes better than college students on a number of standardized US exams but arguably the real test of credibility of course is how well ChatGPT can tackle the ultimate challenge for student geniuses namely University Challenge itself To test this we have used a 2 stage process to rerun the 2022 University Challenge Final with an additional 3rd competitive team namely ChatGPT Firstly all questions and answers and gameplay from the 2022 University College Final between Imperial College London and Reading University were captured and recorded on a script Secondly all the same questions in the same order were posed to ChatGPT and its answers recorded and scored for accuracy The contest was then rescored as a 3 way competition between ChatGPT Imperial Reading and also as 2 additional standalone 2 way contests between ChatGPT v Imperial and for ChatGPT v Reading Scripts for the questions and answers for each of these 4 contests one original and 3 new and synthetic are included in the Appendices so that the reader can compare and contrast the different strengths and weaknesses and depths of apparent knowledge of the 3 teams The results of these 3 test reruns are decisive with ChatGPT winning by a significant margin in the synthetic 3 way match and actually destroying each opponent by KO in the 2 way matches This implies that for traditional type University Challenge and College Bowl type competitions modern AI systems such as ChatGPT are already significantly better than their human adversaries This in turn implies that AI systems including LLMs Large Language Models such as ChatGPT could easily compete directly and in real time in games such as University Challenge perhaps with their responses in turn delivered using AI e g via Avatar or simulation and deep fake type technology It also implies that contests such as University Challenge may have to be made more complex and have their focus shifted to be relatively harder for AI systems and allow humans to retain some inherent advantage in future It also implies that there is a huge risk of AI assisted cheating in any exam type tests that are analogous to University Challenge in requiring the selection of data from a retained memory database or selection of the best answer from a set of possibilities based on knowledge data More broadly and existentially it does raise the question of whether and to what degree it is now useful or efficient for humans to memorize and process huge amounts of knowledge data in everyday life including in professional and academic contexts now that this may be achieved much more efficiently in terms of both time and cost and effectively by available assisting machines In a postscript we also consider University Challenge and College Bowl in the broader sporting and tv contexts of other competitive team university and professional sports including chess soccer rowing college basketball and NBA and college American football and NFL
