 Real-Time Database Systems Kam-Yiu Lam,Tei-Wei Kuo,2000-11-30 In recent years tremendous research has been devoted to the design of database systems for real time applications called real time database systems RTDBS where transactions are associated with deadlines on their completion times and some of the data objects in the database are associated with temporal constraints on their validity Examples of important applications of RTDBS include stock trading systems navigation systems and computer integrated manufacturing Different transaction scheduling algorithms and concurrency control protocols have been proposed to satisfy transaction timing data temporal constraints Other design issues important to the performance of a RTDBS are buffer management index accesses and I O scheduling Real Time Database Systems Architecture and Techniques summarizes important research results in this area and serves as an excellent reference for practitioners researchers and educators of real time systems and database systems *Real-Time Database Systems* Pedro Mejia Alvarez,Ricardo J. Zavaleta Vazquez,Susana Ortega Cisneros,Raul E. Gonzalez Torres,2023-11-08 This book provides an overview of both experimental and commercial real time database systems RTDBs and a systematic approach to understanding designing and implementing them To this end the book is composed of four chapters Chapter 1 An Overview of Real Time Database Systems delves into the realm of RTDBs and discusses the specific requirements transaction models and scheduling algorithms that set RTDBs apart from conventional DBMs Chapter 2 on Experimental Real Time Databases presents various experimental RTDBs developed in academia with their architectures features and implementations while chapter 3 on Commercial Real Time Databases does so for systems developed and offered by commercial vendors as products or services Eventually chapter 4 on Applications of Real Time Database Systems showcases various applications of RTDBs across different domains This book will help researchers graduate students and advanced professionals to get an overview of the area and to understand the main challenges and systems available
