**Recent Advances in Control and Optimization of Manufacturing Systems** George Yin, Qing Zhang, 1996-05-24  
Content Description Includes index Recent Advances in Control and Optimization of Manufacturing Systems George Yin, Qing Zhang, 2014-03-12 In a competitive world research in manufacturing systems plays an important role in creating updating and improving the technologies and management practices of the economy This volume presents some of the most recent results in stochastic manufacturing systems Experts from the fields of applied mathematics engineering and management sciences review and substantially update the recent advances in the control and optimization of manufacturing systems Recent Advances in Control and Optimization of Manufacturing Systems consists of eight chapters divided into three parts which focus on Optimal Production Planning Scheduling and Improvability and Approximate Optimality and Robustness This book is intended for researchers and practitioners in the fields of systems theory control and optimization and operation management as well as in applied probability and stochastic processes **Formal Methods in Manufacturing Systems: Recent Advances** Li, Zhiwu, 2013-05-31 Evolving technologies in mass production have led to the development of advanced techniques in the field of manufacturing These technologies can quickly and effectively respond to various market changes necessitating processes that focus on small batches of multiple products rather than large single product lines Formal Methods in Manufacturing Systems Recent Advances explores this shifting paradigm through an investigation of contemporary manufacturing techniques and formal methodologies that strive to solve a variety of issues arising from a market environment that increasingly favors flexible systems over traditional ones This book will be of particular use to industrial engineers and students of the field who require a detailed understanding of current trends and developments in manufacturing tools This book is part of the Advances in Civil and Industrial Engineering series collection *The Cumulative Book Index*, 1997 A world list of books in the English language **Production Variability in Manufacturing Systems** Jingshan Li, 2000 *Bottlenecks in Production Systems* Chih-Tsung Kuo, 1996 **Recent Advances in Modelling and Control of Stochastic Systems** N. Viswanadham, Vivek S. Borkar, 1991 Operations Research Jay E. Aronson, Stanley Zionts, 1998-03-25 Drawn from a conference honoring Gerald L Thompson the pioneer of operations research this volume brings together some of the latest writings of major figures in the field The volume is divided into four parts the first part reviews the career and significance of Thompson the second concentrates on linear and nonlinear optimization the third looks at network and integer programming and the fourth provides examples of applications oriented research in manufacturing This volume will be an invaluable resource for all scholars and researchers involved in theory and methodology in operations research and management science *Manufacturing & Service Operations Management*, 2002 *Research in Stochastic Programming* John R. Birge, 2001 **New Directions in Nonlinear Observer Design** Hendrik Nijmeijer, Thor I. Fossen, 1999-05-21 The past decade has witnessed an increasing interest in observers for nonlinear systems

This subject is relevant in different contexts such as synchronization of complex dynamical systems fault detection and isolation and output feedback control This book contains the contributions that are to be presented at the workshop New Directions in Nonlinear Observer Design to be held from June 24-26 1999 in Geiranger Fjord Norway The workshop has been organised by Olav Egeland Thor I Fossen and Henk Nijmeijer it will include participants from Africa Asia Europe and USA and it will focus on recent developments in the above mentioned areas The contributions form a good review of present achievements and challenges in nonlinear observer design The workshop is supported by the Strategic University Program on Marine Cybernetics at the Norwegian University of Science and Technology and ABB

*Complex Robotic Systems*  
 Pasquale Chiacchio, Stefano Chiaverini, 1998-04-09 Robotic systems have proved themselves to be of increasing importance and are widely adopted to substitute for humans in repetitive or hazardous situations Their diffusion has outgrown the limits of industrial applications in manufacturing systems to cover all aspects of exploration and servicing in hostile environments such as undersea outer space battlefields and nuclear plants Complex robotic systems ie robotic systems with a complex structure and architecture are gaining increasing attention from both the academic community and industrial users The modelling and control problems for these systems cannot be regarded as simple extensions of those for traditional single manipulators since additional complexity arises to accomplish tasks there is the need to ensure coordinated motion of the whole system together with management of interaction between each component of the system This book focuses on two examples of complex robotic systems namely co operating manipulators and multi fingered hands It is addressed to graduate students as well as to researchers in the field
