*Transcendental Physics. An Account of Experimental Investigations from the Scientific Treatises of Johann Carl Zöllner* Johann Karl Friedrich Zöllner, Charles Carleton Massey, 2025-08-07 Reprint of the original first published in 1881 The Antigonos publishing house specialises in the publication of reprints of historical books We make sure that these works are made available to the public in good condition in order to preserve their cultural heritage A Structural Account of Mathematics Charles S. Chihara, 2004 Charles Chihara's new book develops and defends a structural view of the nature of mathematics and uses it to explain a number of striking features of mathematics that have puzzled philosophers for centuries The view is used to show that in order to understand how mathematical systems are applied in science and everyday life it is not necessary to assume that its theorems either presuppose mathematical objects or are even true Chihara builds upon his previous work in which he presented a new system of mathematics the constructibility theory which did not make reference to or presuppose mathematical objects Now he develops the project further by analysing mathematical systems currently used by scientists to show how such systems are compatible with this nominalistic outlook He advances several new ways of undermining the heavily discussed indispensability argument for the existence of mathematical objects made famous by Willard Quine and Hilary Putnam And Chihara presents a rationale for the nominalistic outlook that is quite different from those generally put forward which he maintains have led to serious misunderstandings *A Structural Account of Mathematics* will be required reading for anyone working in this field *The exhibition record, a descriptive account of the principal exhibits, compiled from special suppl. issued with the 'Sanitary record'*. difficulties not evident in physical science experiments Drawing upon several examples the author argues that methodological anomalies prevent microeconomics and statistics from explaining human social behaviour as coherently as the physical sciences explain nature He concludes that controlled social experiments are a frequently overrated tool for social policy improvement     A Critical Dictionary of English Literature and British and American Authors, Living and Deceased, from the Earliest Accounts to the Latter Half of the Nineteenth Century Samuel Austin Allibone,1871     *Chemical news and Journal of physical science* ,1871     The Literary World ,1892     **English Mechanics and the World of Science** ,1889     **London, Edinburgh and Dublin Philosophical Magazine and Journal of Science** ,1884     *Electric Power* ,1889     *Proceedings* ,2005     **The Electrical Journal** ,1898     **Telegraphic Journal and Monthly Illustrated Review of Electrical Science** ,1872
