Psyche At Work Workplace Applications Of Jungian Analytical Psychology:

The Psyche at Work John Hollwitz, Murray Stein, 2015-06-01 How does the corporate world heavily invested in patriarchal values confront these changing times in which other values are challenging long held assumptions about power and structure How can organizations acknowledge their unconscious and do something about it What are their creative sources What are the possibilities for transformation in the structures of traditional organizations and how will such changes affect labor and management The essays in this volume suggest that the theories and insights elaborated originally within the context of Jungian analysis and practice can address these kinds of questions in fruitful and creative ways Murray Stein Organizational Life as Spiritual Practice John Hollwitz Individuation at Work Considerations for Prediction and Evaluation Richard Auger and Pauline Arneberg Analytical Psychology and Organizational Development at Work Cathaleene J Macias and Gregory J Santos The Role of Evaluator as Program Analyst Parallels Between Evaluation and Jungian Analysis Georgia Lepper The Complex in Human Affairs Arthur D Colman Depth Consultation Kaj Noschis Dealing with an Organization s Shadow Aspects Mia Nijsmans A Dionysian Way to Organizational Effectiveness Edwin E Olson Opening to the Change Process The Transcendent Function at Work Medora S Perlman Toward a Theory of the Self in the Group Randal E Ruppert and Aryeh Maidenbaum Psychological Types Job Change and Personal Growth June Singer Jung s Typology in the Workplace

Psyche At Work Murray Stein, 1992-09-01 Insights form a Jungian perspective on power structures personal relations organizational problems and business building in the workplace **Psychological Applications in Management** Tomi L. Wahlstrom, 1999-04 oday s business environment requires more effective leadership than ever In the constantly changing business environment the leader has the central responsibility of keeping people motivated and productive Many companies have been downsizing and laying off employees and leaving behind employees with a wounded morale To lift this morale the leader needs to possess characteristics and qualities that cannot be learned from courses taken in business schools alone These characteristics and qualities can only be learned from life itself in an individual journey of individuation The leader needs to undergo an initiation process from immature psychology to mature psychology Traditionally this process is what makes men out of boys and women out of girls In analytical psychology this journey is called the hero s journey which is based on the hero myth and includes several different initiations and growing steps This study investigates the different initiations included in the hero s journey and the importance of learning how from them to be a responsible effective charismatic and powerful leader The study also illustrates the archetypes a term developed by Dr Carl Jung 1959 to describe the original patterns that guide our behavior involved in the hero s journey and what is required to get through the journey Heroism is not discussed here in the overall sense in which the public defines heroism As such this study does not investigate what motivates people to risk and or sacrifice their lives by attempting to save people from crashed airplanes Although this aspect of sacrifice is always present in heroism this aspect is just one of the many aspects of heroism Neither a heroic act of

saving lives nor being celebrated on the covers of a national newspaper is required to be recognized as a hero. Individuals are all heroes in their own way. Some individuals manifest their heroism in very silent ways, introversion, while other individuals seem always to be in the public eye, extroversion. The essence of heroism always involves taking a journey into the unknown and bringing some sort of knowledge out of the unknown that benefits either society or an organization. The hero brings new prosperity to the organizational wasteland. Heroism in mass media and movie entertainment is very different from heroism in the psychological sense and in the mythological sense, although there are some similar elements. The basic elements of the hero, the villain, and the fair maiden are always present in popular movies, but the steps of the hero's journey are often not involved, which leaves nothing more than a meaningless plot good only for entertainment purposes. These types of movies can steal an individual's sense of understanding of both the myth and the purpose of the hero's journey. This study is neither discussing the heroes of our popular culture nor is this a study of Hollywood's creations or of celebrated athletes or even of famed political and war heroes. The focus within this study is a hero's journey in the career of a leader and how the journey can bring the light of individuation into the darkness of the organizational wasteland. The legacy of Roberto Goizueta, who died in October 1997 during the writing of this dissertation, is also acknowledged. While his death in itself does not change the conclusions of this dissertation, his contribution to the Coca-Cola Company's success in traveling the hero's journey has been enormous. It remains to be seen what the future brings to this great company after losing such a charismatic and heroic leader.

An Introduction to Jungian Coaching Avi Goren-Bar, 2021-11-09. Based on the psychology of Carl Jung, this illuminating new book invites coaches to extend their toolbox with deep, creative, and efficient professional methods that derive from a new perspective on coaching. In using the unconscious archetypes as a practical, active psychological database for change, the Jungian coach can contribute significant modification in the coachee's expected behavior. Jungian Coaching can be applied in evaluating the coachee, the team, and the corporation. This book translates Jungian psychology into simple, comprehensive concepts. Each chapter translates theoretical concepts and rationale to the practice of coaching. Illustrated with practical examples from the corporate world and life coaching, it offers Jungian Coaching tools and techniques. By integrating the Gestalt psychology principle of the here and now into Jungian concepts, the author develops a new coaching tool that enables an activation of archetypes as a useful and empowering coaching experience. A valuable introductory resource for all those involved in coaching relationships, this book can empower coachees and serve as a compass for personal growth. It will be of great interest to practicing coaches, executives, human resource managers, consultants, and psychotherapists.
