Recent Advances In Parallel Virtual Machine And Message Passing Interface:

Recent Advances in Parallel Virtual Machine and Message Passing Interface Jack Dongarra, Peter Kacsuk, Norbert Podhorszki, 2000-08-30 This book constitutes the refereed proceedings of the 7th European PVM MPI Users Group Meeting held in Balatonfured Hungary in September 2000. The 35 revised papers and seven posters presented were carefully reviewed and selected for inclusion in the book. The book offers topical sections on evaluation and performance algorithms, extensions and improvements, implementation, heterogeneous distributed systems, tools and applications in science and engineering. All current aspects of the parallel virtual machine approach and the message passing interface paradigm are addressed.

Recent Advances in Parallel Virtual Machine and Message Passing Interface Dieter Kranzlmüller, Peter Kacsuk, Jack Dongarra, 2004-11-29 The message passing paradigm is the most frequently used approach to develop high performance computing applications on parallel and distributed computing architectures. Parallel Virtual Machine (PVM) and Message Passing Interface (MPI) are the two main representatives in this domain. This volume comprises 50 selected contributions presented at the 11th European PVM MPI Users Group Meeting which was held in Budapest Hungary September 19-22 2004. The conference was organized by the Laboratory of Parallel and Distributed Systems (LPDS) at the Computer and Automation Research Institute of the Hungarian Academy of Sciences (MTA SZTAKI). The conference was previously held in Venice Italy 2003, Linz Austria 2002, Santorini Greece 2001, Balatonfured Hungary 2000, Barcelona Spain 1999, Liverpool UK 1998 and Krakow Poland 1997. The first three conferences were devoted to PVM and were held in Munich Germany 1996, Lyon France 1995 and Rome Italy 1994. In its eleventh year, this conference is well established as the forum for users and developers of PVM, MPI and other message passing environments. Interactions between these groups have proved to be very useful for developing new ideas in parallel computing and for applying some of those already existent to new practical fields. The main topics of the meeting were evaluation and performance of PVM and MPI, extensions, implementations and improvements of PVM and MPI, parallel algorithms using the message passing paradigm and parallel applications in science and engineering. In addition, the topics of the conference were extended to include cluster and grid computing in order to reflect the importance of this area for the high performance computing community.

Recent Advances in Parallel Virtual Machine and Message Passing Interface Jack Dongarra, 2003-09-23 This book constitutes the refereed proceedings of the 10th European PVM MPI Users Group Meeting held in Venice Italy in September-October 2003. The 64 revised full papers and 16 revised short papers presented together with abstracts of 8 invited contributions and 7 reviewed special track papers were carefully reviewed and selected from 115 submissions. The papers are organized in topical sections on evaluation and performance analysis, parallel algorithms using message passing, extensions, improvements and implementations of PVM, MPI, parallel programming, tools, applications in science and engineering, grid and heterogeneous computing and numerical simulation of parallel engineering environments.
