

Study Guide: Principles of Financial and Managerial Accounting - D196

Accounting

A system for providing quantitative, financial information about economic entities that is useful for making sound economic decisions. Accounting provides the means of recording and communicating business activities and the results of those activities.

Accounting Cycle

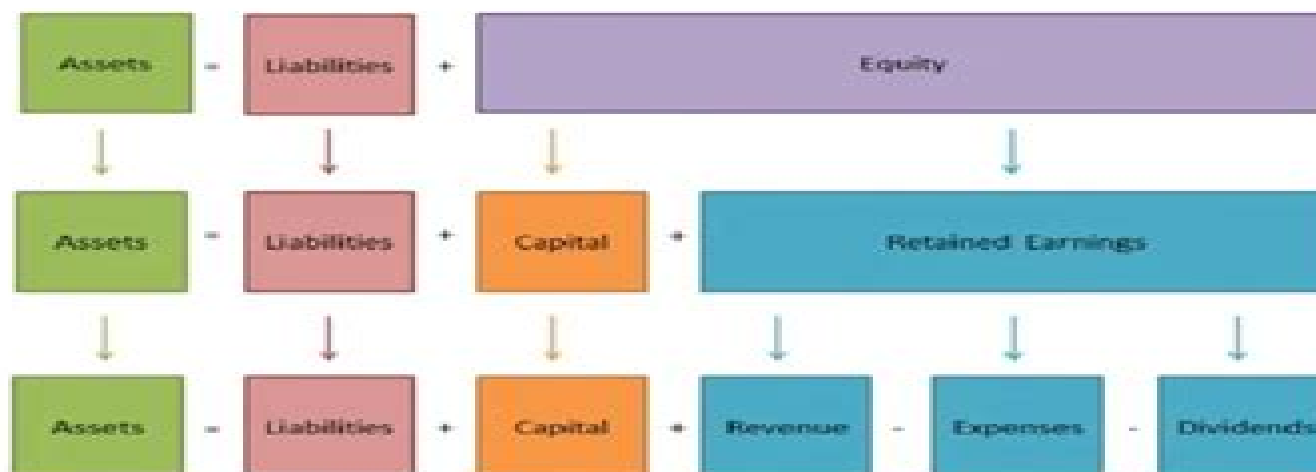

The procedure for analyzing, recording, summarizing, and reporting the transactions of a business.

Accounting Equation

An algebraic equation that expresses the relationship between assets (resources), liabilities (obligations), and owner's equity (net assets, or the residual interest in a business after all liabilities have been met): $\text{Assets} = \text{Liabilities} + \text{Owners' Equity}$.

Accounting System

The procedures and processes used by a business to **analyze** transactions, handle routine **bookkeeping** tasks, and structure information so it can be used to **evaluate** the performance and health of the business.
