Robust Statistical Procedures Asymptotics And Interrelations:

   Robust Statistical Procedures Jana Jurecková,Pranab Kumar Sen,1996-04-19 A broad and unified methodology for robust statistics with exciting new applications Robust statistics is one of the fastest growing fields in contemporary statistics It is also one of the more diverse and sometimes confounding areas given the many different assessments and interpretations of robustness by theoretical and applied statisticians This innovative book unifies the many varied yet related concepts of robust statistics under a sound theoretical modulation It seamlessly integrates asymptotics and interrelations and provides statisticians with an effective system for dealing with the interrelations between the various classes of procedures Drawing on the expertise of researchers from around the world and covering over a decade s worth of developments in the field Robust Statistical Procedures Asymptotics and Interrelations Discusses both theory and applications in its two parts from the fundamentals to robust statistical inference Thoroughly explores the interrelations between diverse classes of procedures unlike any other book Compares nonparametric procedures with robust statistics explaining in detail asymptotic representations for various estimators Provides a timesaving list of mathematical tools for the problems under discussion Keeps mathematical abstractions to a minimum in spite of its largely theoretical content Includes useful problems and exercises at the end of each chapter Offers strategies for more complex models when using robust statistical procedures Self contained and rounded in approach this book is invaluable for both applied statisticians and theoretical researchers for graduate students in mathematical statistics and for anyone interested in the influence of this methodology   *Methodology in Robust and Nonparametric Statistics* Jana Jureckova,Pranab Sen,Jan Picek,2012-07-20 Robust and nonparametric statistical methods have their foundation in fields ranging from agricultural science to astronomy from biomedical sciences to the public health disciplines and more recently in genomics bioinformatics and financial statistics These disciplines are presently nourished by data mining and high level computer based algo   **Statistical Methods in Spatial Epidemiology** Andrew B. Lawson,2013-07-08 Spatial epidemiology is the description and analysis of the geographical distribution of disease It is more important now than ever with modern threats such as bio terrorism making such analysis even more complex This second edition of Statistical Methods in Spatial Epidemiology is updated and expanded to offer a complete coverage of the analysis and application of spatial statistical methods The book is divided into two main sections Part 1 introduces basic definitions and terminology along with map construction and some basic models This is expanded upon in Part II by applying this knowledge to the fundamental problems within spatial epidemiology such as disease mapping ecological analysis disease clustering bio terrorism space time analysis surveillance and infectious disease modelling Provides a comprehensive overview of the main statistical methods used in spatial epidemiology Updated to include a new emphasis on bio terrorism and disease surveillance Emphasizes the importance of space time modelling and outlines the practical application of the method Discusses the wide range of software available for analyzing spatial data including WinBUGS SaTScan and R and

Mardia,Peter E. Jupp,2000 Observations which are directions axes or rotations occur in many sciences including astronomy biology earth sciences image analysis and medicine To analyse such data it is necessary to use the techniques of directional statistics in which the special structure of circles spheres and rotation groups is taken into account This book gives a unified and comprehensive account of directional statistics presenting both the underlying statistical theory and the practical methodology The book is divided into three parts The first part concentrates on statistics on the circle Topics covered include tests of uniformity tests of goodness of fit inference on von Mises distributions and non parametric methods The second part considers statistics on spheres of arbitrary dimension and includes a detailed account of inference on the main distributions on spheres Recent material on correlation regression time series robust techniques bootstrap methods density estimation

and curve fitting is presented The third part considers statistics on more general sample spaces in particular rotation groups Stiefel manifolds Grassmann manifolds and complex projective spaces Shape analysis is considered from the perspective of directional statistics This text will be invaluable not only to researchers in probability and statistics interested in the latest developments in directional statistics but also to practitioners and researchers in many scientific fields including astronomy biology computer vision earth sciences and image analysis   **Breakthroughs in Statistics** Samuel Kotz,Norman Lloyd Johnson,1992 This is author approved bcc This is the third volume of a collection of seminal papers in the statistical science written during the past 110 years These papers have each had an outstanding influence on the development of statistical theory and practice over the last century Each paper is preceded by an introduction written by an authority in the field providing background information and assessing its influence Volume III concertrates on articles from the 1980 s while including some earlier articles not included in Volumes I and II Samuel Kotz is Professor of Statistics in the College of Business and Management at the University of Maryland Norman L Johnson is Professor Emeritus of Statistics at the University of North Carolina Also available Breakthroughs in Statistics Volume I Foundations and Basic Theory Samuel Kotz and Norman L Johnson Editors 1993 631 pp Softcover ISBN 0 387 94037 5 Breakthroughs in Statistics Volume II Methodology and Distribution Samuel Kotz and Norman L Johnson Editors 1993 600 pp Softcover ISBN 0 387 94039 1
